THE GENERAL ASSEMBLY OF PENNSYLVANIA

---

HOUSE BILL

No. 1630 Session of  
2015

---

INTRODUCED BY DAVIDSON, KINSEY, ROZZI, MURT, COHEN, THOMAS,  
YOUNGBLOOD, DEAN, DAVIS, BISHOP, V. BROWN, BULLOCK AND  
DRISCOLL, OCTOBER 15, 2015

---

REFERRED TO COMMITTEE ON HEALTH, OCTOBER 15, 2015

---

AN ACT

1 Amending the act of July 9, 1976 (P.L.817, No.143), entitled "An  
2 act relating to mental health procedures; providing for the  
3 treatment and rights of mentally disabled persons, for  
4 voluntary and involuntary examination and treatment and for  
5 determinations affecting those charged with crime or under  
6 sentence," establishing an Assertive Community Treatment  
7 Program in the Department of Human Services.

8 The General Assembly of the Commonwealth of Pennsylvania  
9 hereby enacts as follows:

10 Section 1. The act of July 9, 1976 (P.L.817, No.143), known  
11 as the Mental Health Procedures Act, is amended by adding  
12 articles to read:

13 ARTICLE III-A

14 (RESERVED)

15 ARTICLE III-B

16 ASSERTIVE COMMUNITY TREATMENT

17 Section 301-B. Declaration of policy.

18 The General Assembly finds and declares as follows:

19 (1) ACT services are targeted to individuals with  
20 serious mental illnesses that cause symptoms and impairments

1 in basic mental and behavioral processes.

2 (2) Patients are not excluded from ACT services because  
3 of severity of illness, disruptiveness in the community or  
4 hospital or failure to participate in or respond to  
5 traditional mental health services.

6 (3) ACT services are individually tailored for each  
7 patient through relationship building, individualized  
8 assessment and planning and active involvement with a patient  
9 to enable each patient:

10 (i) to find and live in his own residence;

11 (ii) to find and maintain work in the community;

12 (iii) to better manage symptoms;

13 (iv) to achieve individual goals; and

14 (v) to maintain optimism and recover.

15 (4) The ACT team shall advocate for patients' self-  
16 determination and independence in day-to-day activities.

17 Section 302-B. Definitions.

18 The following words and phrases when used in this article  
19 shall have the meanings given to them in this section unless the  
20 context clearly indicates otherwise:

21 "ACT services." Assertive community treatment services  
22 provided in accordance with this article.

23 "ACT team." A group of multidisciplinary mental health staff  
24 who work as a team to deliver ACT services.

25 "Assertive community treatment" or "ACT." A service delivery  
26 model for providing comprehensive community-based treatment to  
27 individuals with serious mental illness that is a self-contained  
28 mental health program made up of a multidisciplinary mental  
29 health staff, including a peer specialist, who work as a team to  
30 provide the majority of treatment, rehabilitation and support

1 services that patients need to achieve their goals.

2 "Comprehensive assessment." The organized process of  
3 gathering and analyzing current and past information with each  
4 patient and the patient's family, support system and other  
5 significant people to evaluate:

6 (1) Mental and functional status.

7 (2) Effectiveness of past treatment.

8 (3) Current treatment, rehabilitation and support needs  
9 to achieve individual goals and support recovery.

10 "DACTS." The Dartmouth Assertive Community Treatment Scale,  
11 a research-based instrument developed to assess the degree to  
12 which an ACT provider achieves the ACT model and to quantify the  
13 requirements related to a provider's organization, structure and  
14 provision of direct services. The department shall identify the  
15 version of DACTS for use as an assessment tool.

16 "Department." The Department of Human Services of the  
17 Commonwealth.

18 "DSM." The Diagnostic and Statistical Manual of Mental  
19 Disorders or any successor.

20 "Homeless." When an individual lives outdoors or the primary  
21 residence of an individual during the night is in a supervised  
22 public or private facility that provides temporary living  
23 accommodations.

24 "Imminent risk of being homeless." A situation in which an  
25 individual meets at least one of the following criteria:

26 (1) Doubled-up living arrangement where the individual's  
27 name is not on the lease.

28 (2) Living in a condemned building without a place in  
29 which to move.

30 (3) Having arrears in rent and utility payments with no

1 ability to pay.

2 (4) Having received an eviction notice without a place  
3 in which to move.

4 (5) Living in temporary or transitional housing that  
5 carries time limits or being discharged from a health care or  
6 correctional facility without a place to live.

7 "Individual treatment team." A group or combination of a  
8 minimum of three to five team members who together have a range  
9 of clinical and rehabilitation skills and expertise who are  
10 assigned to a particular patient.

11 "Individual supportive therapy." Verbal therapies, including  
12 psychotherapy, that help individuals make changes in their  
13 feelings, thoughts and behavior in order to move toward  
14 recovery, clarify goals and address self-esteem issues.  
15 Supportive therapy helps patients identify and achieve personal  
16 goals, understand and identify symptoms in order to find  
17 strategies to lessen distress and symptomatology, improve role  
18 functioning and evaluate treatment and rehabilitative services.  
19 Psychotherapy approaches include cognitive behavioral therapy,  
20 personal therapy and psychoeducational therapy.

21 "Initial assessment." An initial evaluation of a patient to  
22 determine the following:

23 (1) The patient's mental and functional status.

24 (2) The effectiveness of past treatment.

25 (3) The current treatment, rehabilitation and support  
26 service needs.

27 "Mental health advance directive." A written document that  
28 describes a patient's advance directive and preference for  
29 treatment in the event that the patient's mental illness renders  
30 the patient unable to make decisions.

1 "Office of Mental Health and Substance Abuse Services." The  
2 Office of Mental Health and Substance Abuse Services in the  
3 Department of Human Services.

4 "Patient." An individual who has agreed to receive services  
5 and is receiving patient-centered treatment, rehabilitation and  
6 support services from an ACT team.

7 "Patient-centered community support plan." The culmination  
8 of a collaborative process involving a patient, the patient's  
9 family with the patient's consent, the patient's identified  
10 support network and the ACT team, which sets forth in writing a  
11 plan that individualizes service activity and intensity to meet  
12 patient-specific treatment, rehabilitation and support needs.  
13 The plan documents a patient's self-determined goals and the  
14 services necessary to help the patient achieve them. The plan  
15 also delineates the roles and responsibilities of team members  
16 who will carry out the services.

17 "Patient-centered individualized treatment plan." A patient-  
18 centered community support plan.

19 "Peer support." Supportive intervention provided by a  
20 certified peer specialist who has experience as a recipient of  
21 mental health services for serious mental illness. The term  
22 includes drawing on common experiences as well as using and  
23 sharing practical experiences and knowledge gained as a  
24 recipient of mental health services, which may validate  
25 patients' experiences and provide guidance and encouragement to  
26 patients to take responsibility and actively participate in  
27 their own recovery.

28 "Program." The Assertive Community Treatment Program  
29 established in section 303-B.

30 "Provider." A provider of ACT services licensed by the

1 department under section 304-B.

2 "Recovery." A self-determined and holistic journey that  
3 people undertake to heal and grow. Recovery is facilitated by  
4 relationships and environments that provide hope, empowerment,  
5 choices and opportunities that promote people reaching their  
6 full potential as individuals and community members.

7 "Service coordination." A process of organization and  
8 coordination within a multidisciplinary team to carry out the  
9 range of treatment, rehabilitation and support services each  
10 patient expects to receive in accordance with the patient's  
11 treatment plan.

12 "Team member." An ACT team member.

13 "Treatment plan." A patient-centered community support plan  
14 or patient-centered individualized treatment plan.

15 "Wellness Recovery Action Plan" or "WRAP." A tool designed  
16 for self-management of illness and wellness that is facilitated  
17 only by those who have completed department-approved training.  
18 Section 303-B. Program.

19 (a) Establishment.--The department shall establish in its  
20 Office of Mental Health and Substance Abuse Services the  
21 Assertive Community Treatment Program to deliver ACT services in  
22 each county of this Commonwealth.

23 (b) Organization.--An ACT team shall be organized or  
24 identified as a separate service within the organization of the  
25 provider. Teams operating in urban and rural settings shall be  
26 designated as full-size teams and modified teams, respectively,  
27 as determined by the department.

28 Section 304-B. Eligibility.

29 (a) Provider participation.--ACT providers shall be licensed  
30 and approved by the department. A prospective provider shall

1 complete an enrollment application and list each service  
2 location that will be performing ACT.

3 (b) Patient eligibility.--An individual who is 18 years of  
4 age or older and has serious and persistent mental illness shall  
5 be eligible for ACT services. An individual shall be considered  
6 to have a serious and persistent mental illness when all of the  
7 following criteria are met:

8 (1) Primary diagnosis of schizophrenia or other  
9 psychotic disorders, such as schizoaffective disorder or  
10 bipolar disorder as defined in the DSM. Individuals with a  
11 primary diagnosis of a substance use disorder, intellectual  
12 disability or brain injury are not eligible patients.

13 (2) Global Assessment of Functioning Scale, as specified  
14 in DSM, ratings of 40 or below.

15 (3) Patients who meet at least two of the following  
16 criteria:

17 (i) At least two psychiatric hospitalizations in the  
18 past 12 months or lengths of stay totaling over 30 days  
19 in the past 12 months that may include admissions to  
20 psychiatric emergency services.

21 (ii) Intractable severe major symptoms.

22 (iii) Co-occurring mental illness and substance use  
23 disorders of more than six months' duration at the time  
24 of contact.

25 (iv) High-risk or recent history of criminal justice  
26 system involvement, which may include frequent contact  
27 with law enforcement personnel, incarcerations, parole or  
28 probation.

29 (v) Homeless, at imminent risk of being homeless or  
30 residing in unsafe housing.

1           (vi) Residing in an inpatient or supervised  
2           community residence, but clinically assessed to be able  
3           to live in a more independent living situation if  
4           intensive services are provided, or requiring a  
5           residential or institutional placement if more intensive  
6           services are not available.

7           (4) Difficulty effectively utilizing traditional case  
8           management or office-based outpatient services or evidence  
9           that a more assertive and frequent non-office-based service  
10          is required to meet clinical needs.

11          (c) Exception.--An individual who does not meet the  
12          requirements identified in subsection (b) may be eligible for  
13          ACT services upon written prior approval by the behavioral  
14          health managed care organization or the county mental health and  
15          intellectual disability office, as applicable. In order to meet  
16          the DACTS standard related to admission criteria, at least 90%  
17          of the patients admitted to the program shall meet the  
18          eligibility criteria under this article.

19          Section 305-B. Discharge.

20          (a) General rule.--The program shall not have an arbitrary  
21          time limit for patients to receive ACT services. An ACT team  
22          shall remain a point of contact for patients as needed. The  
23          provider shall have a no-drop-out policy and work to retain  
24          patients at a mutually satisfactory level. In order to meet  
25          DACTS standards for patient retention, at least 95% of a  
26          provider's caseload must be retained over a 12-month period. A  
27          discharge from ACT services may occur when a patient:

28                  (1) Has successfully reached individually established  
29                  goals for discharge and when the patient and program staff  
30                  mutually agree to the termination of services.

1           (2) Has successfully demonstrated an ability to function  
2 in all major functional areas, including work, social and  
3 self-care, without ongoing assistance from the program,  
4 without significant relapse when services are withdrawn and  
5 when the patient requests termination of services. When a  
6 patient is discharged to a lower level of care, based on a  
7 careful assessment of readiness and upon mutual agreement,  
8 the process shall involve a transition period, including at  
9 least 30 days of overlap of responsibility for monitoring the  
10 patient's status and progress. The patient shall also have  
11 the option to reenroll with the provider. After the  
12 transition period has ended, the ACT team shall periodically  
13 monitor the patient's engagement with a new agency until the  
14 patient is assessed to have fully and successfully engaged  
15 with the new agency.

16           (3) Moves outside the geographic area of the ACT team's  
17 responsibility. In such cases, the ACT team shall arrange for  
18 transfer of mental health service responsibility to a  
19 provider or other entity within the patient's new geographic  
20 location. The ACT team shall maintain contact with the  
21 patient until the service transfer is implemented.

22           (b) Treatment refusal.--If an individual declines or refuses  
23 services and requests discharge despite an ACT team's attempts  
24 to engage the individual in treatment, discharge or transfer to  
25 a lower level of care shall not occur until a thorough review of  
26 the circumstances, clinical situation, risk factors and  
27 strategies to reengage the individual is conducted and  
28 documented.

29 Section 306-B. Responsibilities of county administrators.

30 County mental health administrators in partnership with

1 managed care organizations, as appropriate, shall be responsible  
2 for identifying the need for ACT services, providing for  
3 implementation of the program in the county and developing a  
4 fiscal plan to address program costs. County administrators  
5 shall ensure that the latest version of DACTS is completed  
6 annually for each ACT team either by the managed care  
7 organization or a consultant familiar with DACTS. The results of  
8 the most recent DACTS shall be made available to the department.  
9 The Office of Mental Health and Substance Abuse Services' field  
10 office staff shall monitor the compliance of ACT providers under  
11 their jurisdiction with the provisions of this article. The  
12 county administrators and managed care organizations shall be  
13 responsible for providing fiscal and program outcome reports as  
14 requested by the department.

15 Section 307-B. Responsibilities of providers.

16 Providers shall adhere to the requirements set forth in this  
17 article and submit reports as required by the department and the  
18 county administrator. The ACT team shall maintain written  
19 admission and discharge policies and procedures. The provider  
20 shall develop policies and procedures for each of the areas  
21 identified in the standards. Providers shall maintain the  
22 organizational and services structure that supports the program  
23 and is useful in orienting and training new staff. The following  
24 apply:

25 (1) Providers shall utilize a system to collect and  
26 analyze data pertaining to the program that includes data  
27 required to complete annually the latest version of the  
28 DACTS. The system shall be capable of measuring outcomes, and  
29 the data analysis results from the system shall be used to  
30 improve services and processes.

1           (2) Providers shall establish the minimum number of  
2 staff persons required to cover shifts, set the frequency of  
3 staff services contacts with patients and require gradual  
4 admission of patients to the ACT team.

5           (3) An ACT team shall systematically identify any need  
6 for assertive engagement strategies, use motivational  
7 interventions and employ therapeutic limit setting  
8 interventions only when needed.

9 Section 308-B. Department requirements.

10 (a) General rule.--

11           (1) The department shall establish minimum staff  
12 requirements for full-size and modified ACT teams.

13           (2) The department shall provide standards for use by  
14 providers in coordinating with health insurers for coverage  
15 of ACT services, including specific time frames for  
16 reevaluation of patients to determine their continuing  
17 eligibility for ACT services.

18 Section 309-B. Personnel duties for providers.

19 A provider shall:

20           (1) Maintain written personnel policies and procedures  
21 for hiring.

22           (2) Establish core staff competencies, orientation and  
23 training.

24           (3) Maintain personnel files for each team member  
25 containing the job application, copies of credentials or  
26 licenses, position description, annual performance appraisals  
27 and individual orientation and training plan.

28 Section 310-B. Patient-centered assessment and individualized  
29 treatment planning.

30           (a) Assessment and treatment planning.--A patient and an

1 individual treatment team shall work together to formulate a  
2 patient-centered individualized treatment plan. The individual  
3 treatment team members are assigned to work with a patient by  
4 the team leader and psychiatrist prior to the first treatment  
5 planning meeting or 30 days after admission, whichever occurs  
6 first. The core members are the service coordinator,  
7 psychiatrist and one clinical or rehabilitation staff person who  
8 backs up and shares case coordination tasks and substitutes for  
9 the service coordinator when the service coordinator is  
10 unavailable. The individual treatment team has the  
11 responsibility to:

12 (1) Be knowledgeable about the patient's life,  
13 circumstances, goals and desires.

14 (2) Collaborate with the patient to develop and write  
15 the treatment plan.

16 (3) Offer options and choices in the treatment plan.

17 (4) Ensure that immediate changes are made as a  
18 patient's needs change.

19 (5) Advocate for the patient's wishes, rights and  
20 preferences and support the patient in articulating goals and  
21 plans.

22 (6) Provide the majority of the patient's treatment,  
23 rehabilitation and support services. Individual treatment  
24 team members are assigned to take separate service roles with  
25 the patient as specified by the patient and the individual  
26 treatment team in the treatment plan.

27 (b) Initial assessment.--An initial assessment shall be  
28 completed the day of the patient's admission by the team leader  
29 or the psychiatrist, with participation by designated team  
30 members. The initial assessment shall be based upon all

1 available information, including self-reports, reports of family  
2 members and other significant parties and written summaries from  
3 other agencies, including law enforcement, courts and outpatient  
4 and inpatient facilities, where applicable. The assessment shall  
5 include a review of all aspects of an individual's life,  
6 including physical health, and shall not be limited to mental  
7 health information only. The results of the information  
8 gathering and analysis are used to establish the initial  
9 treatment plan to support recovery and help the patient achieve  
10 individual goals. The patient's initial assessment and treatment  
11 plan guide team services until the comprehensive assessment and  
12 treatment plan are completed. At a minimum, the initial  
13 assessment shall contain the following patient information, with  
14 patient strengths listed for each appropriate item:

- 15       (1) Name and date of birth.
- 16       (2) Telephone number.
- 17       (3) Next of kin.
- 18       (4) Emergency contact.
- 19       (5) Date of admission to the program.
- 20       (6) Social Security number.
- 21       (7) Presenting problem.
- 22       (8) Self-assessment of problem.
- 23       (9) Reason for treatment.
- 24       (10) Availability of social supports and resources.
- 25       (11) History of psychiatric illness and previous  
26 services.
- 27       (12) Developmental and social history.
- 28       (13) Current functioning.
- 29       (14) Mental health diagnosis per the DSM.
- 30       (15) Primary care physician information.

- 1           (16) Physical health diagnosis.
- 2           (17) Current medication list.
- 3           (18) Justification for admission.
- 4           (19) Name of the primary case manager.

5       (c) Initial treatment plan.--A patient's initial treatment  
6 plan shall be completed on the day of admission and shall guide  
7 ACT team services until the comprehensive assessment and  
8 comprehensive treatment plan are completed. Interventions from  
9 the initial treatment plan shall be reported on the patient's  
10 weekly schedule. The service coordinator and individual  
11 treatment team members shall be assigned by the team leader in  
12 collaboration with the psychiatrist at the initial treatment  
13 planning meeting. The time frame to assign the service  
14 coordinator and individual treatment team members shall not  
15 exceed six weeks from the date of admission. At a minimum, the  
16 initial treatment plan shall contain the following information:

- 17           (1) Patient name.
- 18           (2) Date.
- 19           (3) Short-term goals.
- 20           (4) Problems to be addressed.
- 21           (5) Objectives.
- 22           (6) Patient or guardian participation.
- 23           (7) Patient's signature.
- 24           (8) Team leader's signature.

25       (d) Comprehensive assessment.--Each part of the assessment  
26 shall be completed by a team member with skill and knowledge in  
27 the area being assessed. The assessment is based upon all  
28 available information, including information obtained from  
29 patient interview, family members of the patient and other  
30 significant parties and written summaries from other agencies,

1 including law enforcement, courts and outpatient and inpatient  
2 facilities, where applicable. The results of the information  
3 gathering and analysis are used to establish immediate and long-  
4 term service needs, to set goals and to develop the initial  
5 treatment plan with each patient. A comprehensive assessment  
6 shall be initiated and completed within six weeks after a  
7 patient's admission according to the following requirements:

8       (1) In collaboration with the patient, the individual  
9 treatment team shall complete a psychiatric and social  
10 functioning history timeline to chronologically organize  
11 information about significant events in a patient's life, the  
12 patient's experience with mental illness and treatment  
13 history. The individual treatment team shall analyze and  
14 evaluate the information systematically to formulate  
15 hypotheses for treatment and to determine appropriate  
16 treatment and rehabilitation approaches and interventions  
17 with the patient.

18       (2) In collaboration with the patient, the comprehensive  
19 assessment shall include an evaluation in the following  
20 areas:

21           (i) Psychiatric history, mental status and  
22 diagnosis. The psychiatrist shall be responsible for  
23 completing the psychiatric history, mental status and  
24 diagnosis assessment. A psychiatrist or a clinical or  
25 counseling psychologist shall make an accurate diagnosis.  
26 The psychiatrist shall present the assessment findings at  
27 the initial treatment planning meeting. The psychiatric  
28 history, mental status and diagnosis assessment shall  
29 include information from the patient, the patient's  
30 family and past treatment records regarding onset,

1 precipitating events, course and effect of illness,  
2 including past treatment and treatment responses, risk  
3 behaviors and current mental status. The psychiatric  
4 history, mental status and diagnosis assessment shall be  
5 used to effectively plan with the patient and the  
6 patient's family the best treatment approach in order to  
7 ensure accuracy of the diagnosis, to eliminate or reduce  
8 symptomatology and to improve social, vocational and  
9 avocational functioning.

10 (ii) Physical health. A registered nurse shall be  
11 responsible for completing the physical health  
12 assessment. The registered nurse shall present the  
13 assessment findings at the initial treatment planning  
14 meeting. The physical health assessment shall assess  
15 health status and any medical conditions present to  
16 ensure that appropriate treatment, follow-up and support  
17 are provided to the patient. The first interview of a  
18 patient for the purpose of assessment shall take place  
19 within 72 hours of admission.

20 (iii) Use of drugs or alcohol. A team member with  
21 experience and training in dual diagnosis substance abuse  
22 assessment and treatment shall be responsible for  
23 completing the use of drugs and alcohol assessment. The  
24 substance abuse specialist shall present the assessment  
25 findings at the initial treatment planning meeting.

26 (iv) Education and employment. A team member with  
27 experience and training in vocational assessment and  
28 services shall be responsible for completing the  
29 education and employment assessment. The vocational  
30 specialist shall present the assessment findings at the

1 initial treatment planning meeting. A provider shall not  
2 exclude a patient due to poor work history or ongoing  
3 symptoms or impairments related to mental illness. The  
4 education and employment assessment shall determine  
5 current school or employment status, interests and  
6 preferences regarding school and employment and how  
7 symptomatology has affected previous and current school  
8 and employment performance.

9 (v) Social development and functioning. A team  
10 member who is interested and skillful in attainment and  
11 restoration of social and interpersonal skills and  
12 relationships and who is knowledgeable about human  
13 development shall be responsible for completing the  
14 social development and functioning assessment. The team  
15 member who completes the assessment shall present the  
16 assessment findings at the initial treatment planning  
17 meeting. The social development and functional assessment  
18 shall obtain information from the patient about the  
19 patient's childhood, early attachments, role in family of  
20 origin, adolescent and young adult development, culture,  
21 religious beliefs, leisure activities, interests and  
22 social skills. The ACT team shall evaluate how  
23 symptomatology has interrupted or affected personal and  
24 social development, collect information regarding the  
25 patient's involvement with the criminal justice system  
26 and identify social and interpersonal issues appropriate  
27 for individual supportive therapy.

28 (vi) Activities of daily living (ADL) assessment.  
29 Occupational therapists and nurses shall be responsible  
30 to complete the ADL assessment. Other staff members with

1 appropriate training and who have interest in and  
2 compassion for patients in this area may complete the ADL  
3 assessment. The team member who completes the assessment  
4 shall present the assessment findings at the initial  
5 treatment planning meeting. The ADL assessment shall  
6 enable the ACT team to determine the level of assistance,  
7 support and resources the patient needs to reestablish  
8 and maintain ADL. The ADL assessment shall evaluate:

9 (A) The individual's current ability to meet  
10 basic needs.

11 (B) The quality and safety of the patient's  
12 current living situation.

13 (C) The adequacy of the patient's financial  
14 resources.

15 (D) The effect that symptoms and impairments of  
16 mental illness have had on self-care.

17 (E) The patient's ability to maintain an  
18 independent living situation.

19 (F) The patient's desires and individual  
20 preferences.

21 (vii) Family structure and relationships. Members of  
22 a patient's individual treatment team shall be  
23 responsible for carrying out the family structure and  
24 relationships assessment. The staff members working with  
25 the family shall present the assessment findings at the  
26 initial treatment planning meeting. The purpose of the  
27 family structure and relationships assessment shall be to  
28 obtain information from the patient's family and other  
29 significant people about their perspective of the  
30 patient's mental illness and to determine their level of

1 understanding about mental illness as well as their  
2 expectations of ACT services. This information shall  
3 allow the ACT team to define the contact or relationship  
4 between the patient and the patient's family in regard to  
5 the patient's goals, treatment and rehabilitation. The  
6 assessment shall begin at the time of admission.

7 (3) A patient's psychiatrist, service coordinator and  
8 individual treatment team members shall assume responsibility  
9 for preparing the written narrative of the results and  
10 formulation of the psychiatric and social functioning history  
11 timeline and the comprehensive assessment. The psychiatric  
12 and social functioning history timeline and comprehensive  
13 assessment shall be completed within six weeks of the  
14 patient's admission to the program.

15 (e) Individualized community support planning.--The ACT team  
16 shall use recovery planning tools, such as WRAP, and shall  
17 incorporate the individual's recovery planning into all aspects  
18 of treatment and service planning. The ACT team shall also  
19 develop mental health advance directives with each patient,  
20 unless the patient declines. Treatment plans shall be developed  
21 within eight weeks of admission through the following treatment  
22 planning process:

23 (1) A treatment plan shall be developed in collaboration  
24 with the patient and the patient's family or guardian, if  
25 any, when feasible and appropriate. The patient's  
26 participation in the development of the treatment plan shall  
27 be documented. The ACT team and the patient shall assess the  
28 patient's needs, strengths and preferences and develop a  
29 treatment plan. The treatment plan shall be guided primarily  
30 by the patient's self-selected goals and it shall:

1           (i) Identify individual strengths, issues and  
2 problems.

3           (ii) Set specific measurable short-term and long-  
4 term goals for each issue and problem.

5           (iii) Establish the specific approaches and  
6 interventions necessary for the patient to meet the  
7 stated goals, improve capacity to function as  
8 independently as possible in the community and achieve  
9 the maximum level of recovery possible.

10          (2) Team members shall meet at regularly scheduled times  
11 for treatment planning meetings. At each meeting, the  
12 following staff shall attend:

13           (i) Team leader.

14           (ii) Psychiatrist.

15           (iii) Service coordinator.

16           (iv) Individual treatment team members.

17           (v) Peer specialist.

18           (vi) Other team members involved in regular tasks  
19 with the patient.

20          (3) Individual treatment team members shall be  
21 responsible to ensure the patient is actively involved in the  
22 development of recovery and service goals. With the  
23 permission of the patient, team members shall also involve  
24 pertinent agencies and members of the patient's social  
25 network in the formulation of treatment plans.

26          (4) Each patient's treatment plan shall identify the  
27 patient's issues and problems, strengths and weaknesses and  
28 specific measurable short-term and long-term recovery goals.  
29 The plan shall clearly specify the approaches and  
30 interventions necessary for the patient to achieve the

1 individual goals and identify who will carry out the  
2 approaches and interventions. A treatment plan shall  
3 incorporate two or more strengths and resources as identified  
4 in the comprehensive assessment.

5 (5) The following key areas should be addressed in each  
6 patient's treatment plan:

7 (i) Psychiatric illness or symptom reduction.

8 (ii) Housing.

9 (iii) Activities of daily living.

10 (iv) Daily structure and employment.

11 (v) Family and social relationships.

12 (vi) Trauma assessment.

13 (vii) Violence assessment.

14 (6) The service coordinator and the individual treatment  
15 team, together with the patient, shall be responsible for  
16 reviewing and rewriting the treatment goals and plan whenever  
17 there is a major decision point in the patient's course of  
18 treatment or at least every six months, whichever comes  
19 first. The service coordinator shall prepare a summary which  
20 thoroughly describes in writing the patient's and the  
21 individual treatment team's evaluation of patient progress  
22 and goal attainment, the effectiveness of the interventions  
23 and the patient's satisfaction with services since the most  
24 recent treatment plan. The plan and review shall be signed or  
25 verbally approved by the patient, service coordinator,  
26 individual treatment team members, team leader, psychiatrist  
27 and team members.

28 (7) An ACT team shall maintain written assessment and  
29 treatment planning policies and procedures incorporating the  
30 requirements outlined in this section.

1 Section 311-B. Required services.

2 (a) General rule.--An ACT team shall provide comprehensive  
3 treatment, rehabilitation and support services as a self-  
4 contained service unit. Services shall at a minimum include the  
5 following:

6 (1) Service coordination. Each patient shall be assigned  
7 a service coordinator who shall have the primary  
8 responsibility for a patient. A service coordinator shall  
9 lead and monitor the activities of the patient's individual  
10 treatment team and is responsible for service coordination  
11 for the patient. Service coordination shall include  
12 coordination with community resources, including patient  
13 self-help and advocacy organizations that promote recovery.  
14 Members of the patient's individual treatment team shall  
15 share service coordination duties with the service  
16 coordinator and are responsible for performing the duties in  
17 the absence of the service coordinator. In all cases, team  
18 members work with each patient and shall be conversant with a  
19 patient's strengths, background and treatment plan. A service  
20 coordinator:

21 (i) Has primary responsibility for:

22 (A) Establishing and maintaining a therapeutic  
23 relationship with the patient on a continuing basis.

24 (B) Collaborating with the patient to develop a  
25 treatment plan.

26 (C) Providing individual supportive therapy.

27 (D) Offering options and choices in the  
28 treatment plan.

29 (E) Ensuring that immediate changes are made as  
30 the patient's needs change.

1                   (F) Advocating for the patient's wishes, rights  
2                   and preferences.

3                   (ii) May be the first staff person called upon when  
4                   the patient is in crisis.

5                   (iii) Provides primary support and education to the  
6                   patient's family and support system and to other  
7                   significant people in the patient's life.

8                   (iv) Works with community resources, including the  
9                   county mental health and intellectual disability office  
10                   and patient-run services, to coordinate and integrate  
11                   these resources into the patient's treatment plan.

12                   (2) Crisis assessment and intervention. Crisis  
13                   assessment and intervention that includes telephone and face-  
14                   to-face contact shall be provided 24 hours a day, seven days  
15                   a week.

16                   (3) Symptom assessment and management, including, but  
17                   not limited to, the following:

18                   (i) Ongoing comprehensive assessment of the  
19                   patient's mental illness symptoms, accurate diagnosis and  
20                   the patient's response to treatment.

21                   (ii) Psychoeducation regarding mental illness and  
22                   the effects and side effects of prescribed medications.

23                   (iii) Symptom management efforts directed to help  
24                   each patient identify and target the symptoms and  
25                   occurrence patterns of mental illness and develop methods  
26                   to help lessen the effects.

27                   (iv) Individual supportive therapy.

28                   (v) Psychotherapy.

29                   (vi) Psychological support, on a planned and as-  
30                   needed basis, to help patients accomplish their personal

1 goals, to cope with the stressors of day-to-day living  
2 and to recover.

3 (4) Medication prescription, administration, monitoring  
4 and documentation by psychiatrist. The ACT team psychiatrist  
5 shall:

6 (i) Establish an individual clinical relationship  
7 with each patient.

8 (ii) Assess each patient's mental illness symptoms  
9 and determine how these symptoms affect the patient's  
10 ability to function productively and provide verbal and  
11 written information about mental illness to the ACT team,  
12 the patient and the patient's family or significant  
13 others with the patient's consent.

14 (iii) Make an accurate diagnosis based on the  
15 comprehensive assessment.

16 (iv) Provide education about medication, benefits  
17 and risks and obtain informed consent.

18 (v) Assess and document the patient's mental illness  
19 symptoms, behavior and social and community involvement  
20 in response to medication and monitor and document  
21 medication side effects.

22 (vi) Provide psychotherapy.

23 (5) Medication prescription, administration, monitoring  
24 and documentation by team members. Team members shall assess  
25 and document a patient's mental illness symptoms and behavior  
26 in response to medication and shall monitor medication side  
27 effects.

28 (6) Medication prescription, administration, monitoring  
29 and documentation by program. The program shall establish  
30 medication policies and procedures consistent with applicable

1 Federal and State law to identify processes to:

2 (i) Record physician orders.

3 (ii) Order medication.

4 (iii) Arrange for patient medications to be  
5 organized by the ACT team and integrated into patients'  
6 weekly schedules and daily staff assignment schedules.

7 (iv) Provide security for medications and set aside  
8 a private designated area for set up of medications by  
9 the ACT team's nursing staff.

10 (v) Administer medications in accordance with State  
11 law.

12 (7) Dual diagnosis substance abuse services as follows:

13 (i) Provision of a stage-based treatment model that:

14 (A) is nonconfrontational;

15 (B) considers interactions of mental illness and  
16 substance abuse;

17 (C) follows cognitive-behavioral principles;

18 (D) does not expect complete abstinence and  
19 supports harm reduction;

20 (E) understands and applies stages of change  
21 readiness in treatment;

22 (F) incorporates skillful use of motivational  
23 interviewing interventions; and

24 (G) has patient-determined goals.

25 (ii) A stage-based treatment model shall include,  
26 but is not limited to, individual and group interventions  
27 in:

28 (A) Engagement.

29 (B) Assessment, such as stage of readiness to  
30 change and patient-determined problem identification.

1           (C) Motivational enhancement, such as developing  
2           discrepancies and psycho-education.

3           (D) Active treatment, such as cognitive skills  
4           training and community reinforcement.

5           (E) Continuous relapse prevention, such as  
6           trigger identification and building relapse  
7           prevention action plans.

8           (8) Work-related services. Work-related services are  
9           those services that help patients value, find and maintain  
10           meaningful employment in community-based job sites. Work-  
11           related services include, but are not limited to:

12           (i) Assessment of job-related interests and  
13           abilities through a complete education and work history  
14           assessment as well as on-the-job assessments in  
15           community-based jobs.

16           (ii) Assessment of the effect of the patient's  
17           mental illness on employment with identification of  
18           specific behaviors that interfere with the patient's work  
19           performance and development of interventions to reduce or  
20           eliminate those behaviors and find effective job  
21           accommodations.

22           (iii) Development of an ongoing employment  
23           rehabilitation plan to help each patient establish the  
24           skills necessary to find and maintain a job.

25           (iv) Individual supportive therapy to assist  
26           patients to identify and cope with mental illness  
27           symptoms that may interfere with their work performance.

28           (v) On-the-job or work-related crisis intervention.

29           (vi) Work-related supportive services, such as  
30           assistance with grooming and personal hygiene, securing

1 of appropriate clothing, wake-up calls and  
2 transportation, if needed.

3 (vii) Maintaining ongoing relationships with  
4 employers to facilitate the creation of work environments  
5 that would be conducive to the hiring of patients seeking  
6 employment.

7 (viii) Assisting patients in locating jobs that they  
8 are interested in and making the initial contact with the  
9 employer to arrange for any accommodations as necessary  
10 or if requested by patients.

11 (9) Activities of daily living. Services to support  
12 activities of daily living in community-based settings  
13 include individualized assessment, problem solving,  
14 sufficient assistance and support, skill training, ongoing  
15 supervision and environmental adaptations to assist patients  
16 to gain or use the skills required to:

17 (i) Find housing which is safe, of good quality and  
18 affordable, and make living arrangements.

19 (ii) Perform household activities, including house  
20 cleaning, cooking, grocery shopping and laundry, and  
21 carry out personal hygiene and grooming tasks, as needed.

22 (iii) Develop or improve money management skills.

23 (iv) Use available transportation.

24 (v) Have and effectively use a personal physician  
25 and dentist.

26 (10) Social and interpersonal relationship and leisure  
27 time skill training. Services to support social and  
28 interpersonal relationships and leisure time skill training  
29 include individual supportive therapy; social skills teaching  
30 and assertiveness training; planning, structuring, and

1 prompting of social and leisure time activities; support and  
2 coaching; and organizing individual and group social and  
3 recreational activities to structure patients' time, increase  
4 their social experiences and provide them with opportunities  
5 to practice social skills and receive feedback and support  
6 required to:

7 (i) Improve communication skills, develop  
8 assertiveness and increase self-esteem.

9 (ii) Develop social skills, increase social  
10 experiences and develop meaningful personal  
11 relationships.

12 (iii) Plan appropriate and productive use of leisure  
13 time.

14 (iv) Relate to landlords, neighbors and others  
15 effectively.

16 (v) Become familiar with available social and  
17 recreational opportunities and increase use of such  
18 opportunities.

19 (11) Peer support services. Peer support services  
20 validate patients' experiences and guide and encourage  
21 patients to take responsibility for and actively participate  
22 in recovery. In addition, these services help patients  
23 identify, understand and combat stigma and discrimination  
24 against mental illness and develop strategies to enhance  
25 self-esteem. Peer support services are multifaceted and  
26 include, but are not limited to:

27 (i) Individual advocacy, crisis management support  
28 and skills training.

29 (ii) Introduction and referral to patient self-help  
30 programs and advocacy organizations that promote

1 recovery.

2 (iii) Access and utilization of natural resources  
3 within the community.

4 (iv) Cultivation of self-worth and a sense of  
5 wellness.

6 (v) Modeling recovery-oriented attitudes and  
7 behaviors.

8 (12) Support services. Support services or direct  
9 assistance to ensure that patients obtain the basic  
10 necessities of daily life, including, but not limited to:

11 (i) Medical and dental services.

12 (ii) Safe, clean, affordable housing. An ACT team  
13 shall partner with patients in individual housing  
14 assessment and planning. Patients may choose housing in  
15 the most integrated setting possible.

16 (iii) Financial support and benefits counseling.

17 (iv) Social service.

18 (v) Transportation.

19 (vi) Legal advocacy and representation.

20 (13) Education and support of and consultation with  
21 patients' families and other support services. Services  
22 provided regularly under this category to patients' families  
23 and other support services, with patient agreement or  
24 consent, shall include:

25 (i) Individualized psychoeducation about the  
26 patient's illness and the role of the family and other  
27 significant people in the therapeutic process.

28 (ii) Intervention to restore contact, resolve  
29 conflict and maintain relationships with family and other  
30 significant people.

1           (iii) Ongoing communication and collaboration, face-  
2 to-face and by telephone, at least two times per month  
3 for each patient, between the ACT team and the patient's  
4 family and other significant people.

5           (iv) Introduction and referral to family self-help  
6 programs and advocacy organizations that promote  
7 recovery.

8           (v) Assistance to patients with children, including  
9 individual supportive therapy, parenting training and  
10 service coordination, including, but not limited to:

11           (A) Services to help patients throughout  
12 pregnancy and the birth of a child.

13           (B) Services to help patients fulfill parenting  
14 responsibilities and coordinate services for their  
15 children.

16           (vi) Services to help patients restore relationships  
17 with children who are not in the patient's custody.

18       (b) Duties of provider.--The provider shall maintain written  
19 policies and procedures for all services outlined in this  
20 section. If a patient requires services that an ACT team is not  
21 mandated to provide, the team shall coordinate those services  
22 with other providers or entities or consult with other providers  
23 or entities to assist the team in meeting the comprehensive  
24 needs of the individual.

25 Section 312-B. Recordkeeping.

26       Records shall be maintained in accordance with department  
27 guidelines to verify compliance with the requirements of this  
28 article and shall be retained for a minimum of seven years. Site  
29 survey reports, employee schedules, payroll records, patient  
30 case records, medication records, job descriptions, documents

1 verifying employee qualifications and training, policies and  
2 protocols, fees or charges, records of supervision and training,  
3 letters of agreements with referral sources and service agencies  
4 and a grievance and appeals process are records that shall be  
5 kept to verify compliance with this article.

6 Section 313-B. Patient rights and grievance procedures.

7 (a) General rule.--Providers shall have and maintain  
8 policies and procedures for patient rights and grievance  
9 procedures that ensure compliance with Federal and State laws  
10 and ensure that all team members fully understand, inform and  
11 respect a patient's right to appropriate treatment in a setting  
12 and under conditions that are the most supportive of each  
13 individual's personal liberty and restrict such liberty only to  
14 the extent necessary consistent with each patient's treatment  
15 needs, applicable requirements of law and applicable judicial  
16 orders.

17 (b) Confidentiality and treatment conditions.--Providers  
18 shall be knowledgeable about and familiar with patient rights,  
19 including the right to:

- 20 (1) Confidentiality.
- 21 (2) Informed consent to medication and treatment.
- 22 (3) Treatment with respect and dignity.
- 23 (4) Prompt, adequate and appropriate treatment.
- 24 (5) Treatment which is under the least restrictive  
25 conditions.
- 26 (6) Nondiscrimination.
- 27 (7) Control own money.
- 28 (8) File grievances or complaints.
- 29 (9) Mental health advance directives.

30 (c) Grievance and complaint procedures.--Providers shall be

1 knowledgeable about and familiar with the mechanisms to  
2 implement and enforce patient rights with regard to:

3 (1) Grievance or complaint procedures under State law.

4 (2) Medicaid.

5 (3) The Americans with Disabilities Act of 1990 (Public  
6 Law 101-336, 104 Stat. 327).

7 (4) Protection and advocacy for individuals with mental  
8 illness.

9 (5) Mental health advance directives.

10 Section 314-B. Culturally and linguistically appropriate  
11 services.

12 Providers shall:

13 (1) Ensure that patients receive effective,  
14 understandable and respectful care that is provided in a  
15 manner compatible with patients' cultural health beliefs and  
16 practices and written and spoken language preferences,  
17 including American Sign Language and Braille.

18 (2) Maintain written culturally and linguistically  
19 appropriate services policies and procedures in accordance  
20 with this section.

21 (3) Implement strategies to recruit, retain and promote  
22 a diverse staff that are representative of the demographic  
23 characteristics of the service area.

24 (4) Ensure that staff at all levels and across all  
25 disciplines receive ongoing education and training in  
26 culturally and linguistically appropriate service delivery.

27 (5) Offer and provide language assistance services,  
28 including bilingual staff and interpreter services, at no  
29 cost to each patient with limited English proficiency at all  
30 points of contact, in a timely manner during hours of

1 operation.

2 (6) Provide to patients, in their preferred language,  
3 both verbal offers and written notices informing them of  
4 their right to receive language assistance services.

5 (7) Assure the competence of language assistance  
6 provided to limited English proficient patients by  
7 interpreters and bilingual staff. Family and friends shall  
8 not be used to provide interpretation services except when  
9 requested by the patient.

10 (8) Make available easily understood patient-related  
11 materials and post signage in the languages of the commonly  
12 encountered groups and groups represented in the service  
13 area.

14 (9) Develop, implement and promote a written strategic  
15 plan that outlines clear goals, policies, operational plans  
16 and management accountability and oversight mechanisms to  
17 provide culturally and linguistically appropriate services.

18 (10) Conduct initial and ongoing organizational self-  
19 assessments of culturally and linguistically appropriate  
20 services and related activities and are encouraged to  
21 integrate cultural and linguistic competence-related measures  
22 into providers' internal audits, performance improvement  
23 programs, patient satisfaction assessments and outcome-based  
24 evaluations.

25 (11) Ensure that data on the individual patient's race,  
26 ethnicity and spoken and written language are collected in  
27 health records, integrated into the organization's management  
28 information systems and periodically updated.

29 (12) Develop participatory and collaborative  
30 partnerships with communities and utilize a variety of formal

1 and informal mechanisms to facilitate community and patient  
2 involvement in designing and implementing culturally and  
3 linguistically appropriate services and related activities.

4 (13) Ensure that conflict and grievance resolution  
5 processes are culturally and linguistically sensitive and  
6 capable of identifying, preventing and resolving cross-  
7 cultural conflicts or complaints by patients.

8 (14) Make available to the public information about  
9 implementing the culturally and linguistically appropriate  
10 services standards and provide public notice in the community  
11 served of the availability of this information.

12 Section 315-B. Performance improvement and program evaluation.

13 (a) General rule.--Providers shall maintain performance  
14 improvement and program evaluation policies and procedures. Each  
15 provider shall evaluate the following:

16 (1) Patient outcome.

17 (2) Patient and family satisfaction with the services,  
18 including independent patient family satisfaction team  
19 reviews.

20 (3) The degree to which a provider conforms to the ACT  
21 model using the latest version of DACTS. The DACTS shall be  
22 completed annually for each provider either by the managed  
23 care organization or a consultant familiar with DACTS. DACTS  
24 scores shall be used to determine any corrective actions. The  
25 department shall review the results of the DACTS scale along  
26 with the program standards as part of the licensing and  
27 approval process.

28 (b) Plan.--A provider shall have a performance improvement  
29 and program evaluation plan, which shall include the following:

30 (1) A statement of the objectives relating directly to

1 the program's patients or target population.

2 (2) Measurable criteria that shall be applied in  
3 determining whether or not the stated objectives are  
4 achieved.

5 (3) Methods for documenting achievements related to the  
6 program's stated objectives.

7 (4) Methods for assessing the effective use of staff and  
8 resources toward the attainment of the objectives.

9 (c) System.--A provider shall have a system for regular  
10 review that is designed to evaluate the appropriateness of  
11 admissions to the program, treatment or service plans, discharge  
12 practices and other factors that may contribute to the effective  
13 use of the program's resources.

14 Section 316-B. Rate setting and payment.

15 The department shall issue separate communications to address  
16 rate setting and payments.

17 Section 317-B. ACT advisory committee.

18 (a) Policies and procedures.--A provider shall maintain  
19 written advisory committee policies and procedures,  
20 incorporating the requirements outlined in this section.

21 (b) Advisory committee.--Each provider shall establish an  
22 advisory committee to support and enhance the ACT team through  
23 assistance with start up, implementation and ongoing operations.  
24 The committees shall support ACT teams as the providers deliver  
25 each patient high quality, recovery-oriented services.

26 (c) Membership.--The committee membership shall be  
27 representative of the populations served by the provider and  
28 shall include representation from various stakeholder groups in  
29 the community. At least 51% of the advisory committee shall be  
30 comprised of recipients or former recipients of mental health

1 services and family members. Other community stakeholders and  
2 representatives from diverse community services, such as patient  
3 support organizations, food pantries, homeless shelters, housing  
4 authorities, landlords, educational institutions, the criminal  
5 justice system, employers and the business community shall  
6 constitute the remainder of the advisory committee. The  
7 committee membership shall also represent the cultural diversity  
8 of the local population.

9 (d) Meetings.--An advisory committee shall meet at least  
10 quarterly, with regular attendance by a team leader or designee,  
11 and shall:

12 (1) Promote the development and continuation of quality  
13 ACT services.

14 (2) Review compliance with program audits and ACT  
15 program standards.

16 (3) Inform and support the department's ongoing quality  
17 improvement process.

18 (4) Promote and ensure the presence of patients'  
19 empowerment and recovery values.

20 (5) Examine program outcome measures, including patient  
21 and family satisfaction.

22 Section 318-B. Waiver of provisions.

23 (a) General rule.--Providers may request waivers of  
24 requirements in program standards.

25 (b) Waiver conditions.--A provider may request from the  
26 department a waiver of any required standard that would not  
27 diminish the effectiveness of ACT services, violate the purposes  
28 of the program or adversely affect patients' health and welfare.  
29 A waiver shall not be granted if inconsistent with patient  
30 rights or Federal, State or local law or regulation.

1       (c) Admission decisions.--Requests for admission of  
2 individuals who do not meet the eligibility criteria for ACT  
3 services shall be directed to the behavioral health managed care  
4 organization or the county mental health and intellectual  
5 disability office, as applicable, for approval.

6       Section 2. This act shall take effect in 180 days.
