7 consult in developing a request for a proposal, as set forth in § 17-19-2.1. These specifications
8 must be submitted to the department of administration within thirty (30) days of the passage of
9 this bill. These specifications, and the request for a proposal for the options of purchasing, leasing
10 to own, or renting an optical scan precinct count voting system, and for a full-service contract for
11 an optical scan precinct count voting system, shall propose an optical scan precinct count system
12 that shall be constructed and shall operate in a manner that meets the following minimum
13 requirements:

14 (1) It shall enable the voter to:

15 (i) Mark his or her ballot and cast his or her vote in secrecy;

16 (ii) Vote for all candidates of political parties or organizations, and for, or against,
17 questions as submitted;

18 (iii) Vote for as many persons for an office as the voter is lawfully entitled to vote for,
19 but no more; and

20 (iv) Vote on any question the voter may have the right to vote on;

21 (2) It shall prevent the voter from voting for the same person more than once for the
22 same office;

23 (3) The voting equipment shall allow the voter to cast one vote, thereby allowing the
24 voter to vote for all the presidential electors of a party by marking one mark on the ballot, and a
25 ballot containing only the words "presidential electors for," preceded by the name of that party
26 and followed by the names of the candidates of that party for the offices of president and vice-
27 president; provided, that means shall be furnished by which the voter can cast a vote in part for
28 the candidates for presidential electors of one party, and in part for those of one or more other
29 parties, or in part or in whole, for persons not nominated by any party;

30 (4) The optical scan precinct counting system shall meet the following specifications:

31 (i) Vote counting, including absentee ballots, shall be performed through the use of
32 automated electronic equipment;

33 (ii) All vote counting shall be performed on equipment supplied as part of the bid. The
34 system shall not require the use of non-supplied equipment to count ballots or tabulate results;

1 (iii) There shall be privacy enclosures in which a voter may mark his or her ballot or
2 otherwise cast his or her vote in secret;

3 (iv) There shall be a device located in each polling place that can record the vote count
4 and tally the vote count in that polling place and that can produce a printed tally of all races
5 contained on said ballot in human, readable form. The device shall automatically print a "zero
6 report" at the beginning of the day when the device is activated. The device that receives ballots
7 for counting shall have an external counter indicating the number of ballots received. The actual
8 vote tally shall be capable of being performed only by election officials and shall not be visible
9 during the actual voting process. Each recording device shall rest on a ballot box that must have
10 compartments with doors that lock for security of voted ballots and ease of access;

11 (v) As part of the voting process, there shall be created a physical ballot showing the
12 votes cast by an individual voter that is capable of being hand counted so that electronic-
13 recorded-device totals can be checked for accuracy for auditing purposes, or in the event that a
14 recount, conducted pursuant to this chapter, indicates a discrepancy in the number of votes cast in
15 an election or ballot question, or where necessary to ascertain voter intent as provided herein, or
16 to otherwise ensure implementation of a voter's exercise of his or her right to vote. The device
17 must be able to accept a one (1)-two (2)- or three (3)- column ballot that can be printed on one or
18 both sides;

19 (vi) There shall be a device at each polling place to receive the physical audit trail of
20 ballots cast and that shall securely store the ballots and have the capability of restricting access to
21 the ballots only to authorize officials;

22 (vii) In the event of loss of electrical power, the polling place vote count shall be stored
23 on an ongoing basis in media that will retain the count of the votes cast to that point in time for a
24 period of no less than five (5) years;

25 (viii) The polling place vote counts shall be stored on a stable media that may be easily
26 transported and that may be accessed and counted by an electronic device so that state, city,
27 and/or town vote totals can be electronically calculated by combining individual polling place
28 totals. It shall not be necessary to enter individual polling place totals by, and into, a central
29 computer or device for the purpose of producing the state, city, and/or town totals, but rather the
30 electronic media on which the polling place totals are stored shall be directly readable and
31 accessible by a regional or central device;

32 (ix) There shall be a device that has the capability to electronically read the storage
33 device upon which the individual polling place totals are stored and that shall produce a
34 combined total for all races, which total can be printed in easily readable and legible form in a

1 format prescribed by the state board of elections;

2 (x) The system provided shall allow the secretary of state to have the capability to design
3 the ballot format;

4 (xi) The system shall provide a capability for the state, without the use of outside
5 services, to set up and prepare the counting devices to total an election; and

6 (xii) The system must be capable of receiving voted ballots without counting when
7 without power and must provide for securely storing uncounted ballots;

8 (5) The following minimum equipment shall be required for the state:

9 (i) There shall be six hundred (600) units to permit counting to be conducted in each

12 every one hundred seventy-five (175) voters as determined in this title;

13 (iii) The number of polling place units and voting booths must be sufficient to permit the
14 election to run smoothly without excessive waiting of voters;

15 (iv) If there is an increase in the number of polling places statewide during the term of
16 the contract, the vendor will supply additional polling place units and voting booths at a cost
17 proportional to the cost of the initial units pro rated for the balance of the agreement years;

18 (v) (A) There shall be high-speed, absentee vote tabulating equipment. These tabulators,
19 as a whole, must be capable of counting a minimum of four hundred (400) absentee ballots per
20 minute. The tabulators shall utilize the same ballots used in the polling place;

21 (B) This system shall have the following capabilities in connection with the counting of
22 ballots and producing results:

23 (I) This system shall be able to read the media from the polling place units on which
24 polling place results are stored and shall be able to compile polling place results producing a
25 ballot total for each race; and

26 (II) This system shall be capable of producing and printing out ballot totals on a polling-
27 place-by-polling-place basis for each race, and shall be capable of producing a final total and
28 subtotals of all races from all races and polling places in the state. All totals must be able to be
29 produced at any time, based upon the number of polling places counted up to that point in time,
30 and these printout results shall state the number of precincts counted and the percentage of
31 precincts reporting;

32 (vi) There shall be all equipment necessary to program the system and erase the memory
33 devices;

34 (vii) Regional tabulating equipment shall be located in each of the thirty-nine (39) local

1 boards of canvassers and the central tabulation equipment shall be located at the state board of
2 elections. The state board of elections, thirty (30) days prior to an election, shall determine which
3 regional and/or central tabulation sites are to be utilized for the election. The tabulation system
4 shall have the following capabilities in connection with the counting of ballots and producing
5 results:

6 (A) This system shall be able to read the media from the polling place units on which
7 polling place results are stored and shall be able to compile polling place results producing a
8 ballot total for each race;

9 (B) This system shall be capable of producing and printing out ballot totals on a polling-
10 place-by-polling-place basis for each race and shall be capable of producing a final total and
11 subtotal of all races from all races and polling places in the state;

12 (C) All totals must be able to be produced at any time based upon the number of polling
13 places counted up to that point in time, and the printout results shall state the number of precincts
14 counted and the percentage of precincts reporting; and

15 (D) This system shall be capable of transferring information gathered at each regional
16 site to the central site and shall also be capable of transferring information gathered at the central
17 site to a specific, regional site;

18 (6) All necessary programming and accumulation software shall be provided to run the
19 election system in accordance with the required specifications as well as all necessary and
20 required modules. Any software updates during the term of the agreement shall not be charged to

32 less than five (5) years, that entity must submit an audited financial statement for each and every
33 full year that they have been in existence;

34 (ii) Proof of experience in the field of elections including, but not limited to, years of

17 recount, a candidate shall trail the winning candidate by less than the number of votes prescribed
18 in subsection (1)(a) or (2)(a) of this section, as the case may be, the candidate may request a
19 recount of the votes cast at each precinct to subsection (1)(a) or (2)(a) of this section, as is

26 with a hand tally of the votes in one or more audit units and shall continue to hand tally votes in
27 additional audit units until there is strong statistical evidence that the electoral outcome is correct.
28 In the event that counting additional audit units does not provide strong statistical evidence that
29 the electoral outcome is correct, the audit shall continue until there has been a full manual tally to
30 determine the correct electoral outcome of the audited contest.
31 SECTION 7. This act shall take effect upon passage.
