12 **SEC. 102. FINDINGS.**

13 Congress finds the following:

14 (1) Taxpayer-supported research investments ad-
15 ministered by the Foundation should serve the na-
16 tional interest.

17 (2) The Foundation has made major contribu-
18 tions for more than 60 years to strengthen and sus-
19 tain the Nation's academic research enterprise.

20 (3) The economic strength and national security
21 of the United States, and the quality of life of all
22 Americans, are grounded in the Nation's scientific
23 and technological capabilities.

1 (4) *Providing support for basic research is an*
2 *investment in our Nation's future security and eco-*
3 *nomie prosperity.*

4 (5) *Congress applauds the Foundation's recogni-*
5 *tion that wise stewardship of taxpayer dollars is nec-*
6 *essary to maintain and ensure the public's trust for*
7 *funding of fundamental scientific and engineering re-*
8 *search.*

9 (6) *Other nations are increasing their public in-*
10 *vestments in basic research in the physical sciences in*
11 *order to boost long-term economic growth.*

12 (7) *Longstanding United States leadership in*
13 *supercomputing, genomics, nanoscience, photonics,*
14 *quantum physics, and other key technological areas is*
15 *jeopardized if United States investments in basic re-*
16 *search in the natural sciences do not keep pace.*

17 (8) *Redundant regulations and reporting re-*
18 *quirements imposed by Federal agencies on research*
19 *institutions and researchers increase costs by tens of*
20 *millions of dollars annually.*

21 (9) *The Foundation carries out important func-*
22 *tions by supporting basic research in all science and*
23 *engineering disciplines and in supporting STEM edu-*
24 *cation at all levels.*

1 (10) *The research and education activities of the*
2 *Foundation promote the discovery, integration, dis-*
3 *semination, and application of new knowledge in*
4 *service to society and prepare future generations of*
5 *scientists, mathematicians, and engineers who will be*
6 *necessary to ensure America’s leadership in the global*
7 *marketplace.*

8 (11) *Many of the complex problems and chal-*
9 *lenges facing the Nation increasingly require the col-*
10 *laboration of multiple scientific disciplines. The*
11 *Foundation should continue to emphasize cross-direc-*
12 *torate research collaboration and activities to address*
13 *these issues and encourage interdisciplinary research.*

14 (12) *The Foundation should meet the highest*
15 *standards of efficiency, transparency, and account-*
16 *ability in its stewardship of public funds.*

17 (13) *The Foundation is charged with the respon-*
18 *sibilities—*

19 (A) *to develop and encourage the pursuit of*
20 *a national policy for the promotion of basic re-*
21 *search and education in the sciences;*

22 (B) *to initiate, support, and conduct basic*
23 *scientific research and to appraise the impact of*
24 *research on industrial development and the gen-*
25 *eral welfare;*

1 (C) to initiate, support, and conduct sci-
2 entific research activities in connection with
3 matters relating to the national defense, at the
4 request of the Secretary of Defense;

5 (D) to award scholarships and graduate fel-
6 lowships in the sciences;

7 (E) to foster the interchange of scientific in-
8 formation among scientists and across scientific
9 disciplines;

10 (F) to evaluate scientific research programs
11 undertaken by agencies of the Federal Govern-
12 ment, and to correlate the Foundation's scientific
13 research with that undertaken by individuals
14 and by public and private research groups;

15 (G) to communicate effectively to American
16 citizens the relevance of public investments in
17 scientific discovery and technological innovation
18 to the Nation's security, prosperity, and welfare;
19 and

20 (H) to establish such special commissions as
21 the Board considers necessary.

22 (14) The emerging global economic, scientific,
23 and technical environment challenges long standing
24 assumptions about domestic and international policy,
25 requiring the Foundation to play a more proactive

1 *role in sustaining the competitive advantage of the*
2 *United States through superior research capabilities.*

3 **SEC. 103. POLICY OBJECTIVES.**

4 *In allocating resources made available under this title,*
5 *the Foundation shall have the following policy objectives:*

6 *(1) To renew and maintain the Nation's inter-*
7 *national leadership in science and technology by—*

8 *(A) increasing the national investment in*
9 *basic scientific research and increasing inter-*
10 *disciplinary investment in strategic areas vital*
11 *to the national interest;*

12 *(B) balancing the Nation's research port-*
13 *folio among the life sciences, mathematics, the*
14 *physical sciences, computer and information*
15 *science, geosciences, engineering, and social, be-*
16 *havioral, and economic sciences, all of which are*
17 *important for the continued development of ena-*
18 *bling technologies necessary for sustained eco-*
19 *nomics competitiveness;*

20 *(C) encouraging investments in potentially*
21 *transformative scientific research to benefit our*
22 *Nation and its citizens;*

23 *(D) expanding the pool of scientists and en-*
24 *gineers in the United States, including among*

1 *segments of the population that have been his-*
2 *torically underrepresented in STEM fields; and*

3 *(E) modernizing the Nation’s research in-*
4 *frastructure and establishing and maintaining*
5 *cooperative international relationships with pre-*
6 *mier research institutions.*

7 *(2) To increase overall workforce skills by—*

8 *(A) improving the quality of STEM edu-*
9 *cation and tools provided both inside and outside*
10 *of the classroom, including in kindergarten*
11 *through grade 12; and*

12 *(B) expanding STEM training opportuni-*
13 *ties at institutions of higher education.*

14 *(3) To strengthen innovation by expanding the*

2 *research findings cannot be reproduced or replicated,*
3 *which can negatively affect the public's trust in*
4 *science;*

5 (3) *there are a complex set of factors affecting re-*
6 *producibility and replication; and*

14 *award competitive, merit-reviewed grants to support—*

15 (1) *research and development of innovative out-*
16 *of-school STEM learning and emerging STEM learn-*

3 **MATHEMATICS**

4 **SEC. 201. FINDINGS; SENSE OF CONGRESS.**

5 (a) *FINDINGS.*—Congress finds the following:

6 (1) *According to the National Science Board’s*
7 *Science and Engineering Indicators, the science and*
8 *engineering workforce has shown sustained growth for*
9 *more than half a century, and workers with science*
10 *and engineering degrees tend to earn more than com-*
11 *parable workers in other fields.*

12 (2) *According to the Program for International*
13 *Student Assessment 2012 results, America lags behind*
14 *many other nations in STEM education. American*
15 *students rank 21st in science and 26th in mathe-*
16 *matics.*

17 (3) *Junior Achievement USA and ING found a*
18 *decrease of 25 percent in the percentage of teenage*
19 *students interested in STEM careers.*

20 (4) *According to a 2007 report from the Depart-*
21 *ment of Labor, industries and firms dependent on a*
22 *strong science and mathematics workforce have*
23 *launched a variety of programs that target K-12 stu-*
24 *dents and undergraduate and graduate students in*
25 *STEM fields.*

1 (5) *The Federal Government spends nearly \$3*
2 *billion annually on STEM education related program*
3 *and activities, but encouraging STEM education ac-*
4 *tivities beyond the scope of the Federal Government,*
5 *including privately sponsored competitions and pro-*
6 *grams in our schools, is crucial to the future technical*
7 *and economic competitiveness of the United States.*

8 (b) *SENSE OF CONGRESS.—It is the sense of Congress*
9 *that—*

10 (1) *more effective coordination and adoption of*
11 *performance measurement based on objective outcomes*
12 *for federally supported STEM programs is needed;*

13 (2) *leveraging private and nonprofit investments*
14 *in STEM education will be essential to strengthening*
15 *the Federal STEM portfolio;*

16 (3) *strengthening the Federal STEM portfolio*
17 *may require program consolidations and termi-*
18 *nations, but such changes should be based on evidence*
19 *with stakeholder input;*

20 (4) *coordinating STEM programs and activities*
21 *across the Federal Government in order to limit du-*
22 *plication and engage stakeholders in STEM programs*
23 *and related activities for which objective outcomes can*
24 *be measured will bolster results of Federal STEM edu-*
25 *cation programs, improve the return on taxpayers’*

1 *investments in STEM education programs, and in*
2 *turn strengthen the United States economy; and*

3 *(5) as the Committee on STEM Education im-*
4 *plements the 5-year Strategic Plan for Federal STEM*
5 *education required under section 101(b)(5) of the*
6 *America COMPETES Reauthorization Act of 2010*
7 *(42 U.S.C. 6621(b)(5)), STEM education stakeholders*
8 *must be engaged and outcome-based evaluation*
9 *metrics should be considered in the coordination and*
10 *consolidation efforts for the Federal STEM portfolio.*

24 *ments;*
