IN THE HOUSE OF REPRESENTATIVES

JULY 21, 2015

Mr. ENGEL (for himself, Mr. REED, and Mr. CLEAVER) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Public Health Service Act to increase the number of permanent faculty in palliative care at accredited allopathic and osteopathic medical schools, nursing schools, social work schools, and other programs, including physician assistant education programs, to promote education and research in palliative care and hospice, and to support the development of faculty careers in academic palliative medicine.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Palliative Care and
3 Hospice Education and Training Act”.

4 **SEC. 2. FINDINGS.**

5 Congress makes the following findings:

6 (1) Health care providers need better education
7 about pain management and palliative care. Stu-
8 dents graduating from medical school have very lit-
9 tle, if any, training in the core precepts of pain and
10 symptom management, advance care planning, com-
11 munication skills, and care coordination for patients
12 with serious, life-threatening, or terminal illness.

13 (2) Palliative care is interdisciplinary, patient-
14 and family-centered health care for people with seri-
15 ous illnesses. This type of care is focused on pro-
16 viding patients with relief from the symptoms, pain,
17 and stress of a serious illness, whatever the diag-
18 nosis. The goal of palliative care is to relieve suf-
19 fering and improve quality of life for both patients
20 and their families. Palliative care is provided by a
21 team of doctors, nurses, social workers, physician as-
22 sistants, chaplains, and other specialists who work
23 with a patient’s other health care providers to pro-
24 vide an extra layer of support, including assistance
25 with difficult medical decisionmaking and coordina-
26 tion of care among specialists. Palliative care is ap-

1 appropriate at any age and at any stage in a serious
2 illness, and can be provided together with curative
3 treatment. Palliative care is not dependent on a life-
4 limiting prognosis and may actually help an indi-
5 vidual recover from illness by relieving symptoms,
6 such as pain, anxiety, or loss of appetite, while un-
7 dergoing sometimes difficult medical treatments or
8 procedures, such as surgery or chemotherapy. In
9 2013, 1,744 United States hospitals with 50 or more
10 beds had a palliative care program.

11 (3) Hospice is palliative care for patients in
12 their last year of life. Considered the model for qual-
13 ity compassionate care for individuals facing a life-
14 limiting illness, hospice provides expert medical care,
15 pain management, and emotional and spiritual sup-
16 port expressly tailored to the patient's needs and
17 wishes. In most cases, care is provided in the pa-
18 tient's home but may also be provided in free-
19 standing hospice centers, hospitals, nursing homes,
20 and other long-term care facilities. In 2012, an esti-
21 mated 1.5 million to 1.6 million patients received
22 services from hospice, including non-Medicare bene-
23 ficiaries. Nearly 45 percent of all deaths in the
24 United States in 2011 occurred under the care of a
25 hospice program. Hospice is a covered benefit under

1 the Medicare program. There were 3,782 Medicare-
2 certified hospices serving more than 1,200,000 Medi-
3 care beneficiaries in 2012.

4 (4) Despite a high intensity of medical treat-
5 ment, many seriously ill patients experience trou-
6 bling symptoms, unmet psychological and personal
7 care needs, and high caregiver burden. Numerous
8 studies have shown that adding palliative care can
9 improve pain and symptom control, quality of life,
10 and family satisfaction with care.

11 (5) A 2005 study at Michigan State University
12 found that the formal training of United States doc-
13 tors in palliative care is “grossly inadequate”. When
14 the American Society of Clinical Oncology surveyed
15 their members, 65 percent said they had received in-
16 adequate education in controlling symptoms associ-
17 ated with cancer, and 81 percent felt they had inad-
18 equate mentoring in discussing a poor prognosis
19 with their patients and families. Training in pedi-
20 atric palliative care is also seriously lacking accord-
21 ing to physicians, residents, and medical students re-
22 sponding to a survey presented at a meeting of
23 American Federation for Medical Research.

24 (6) The American Board of Medical Specialties
25 (ABMS) and the Accreditation Council for Graduate

1 Medical Education (ACGME) provided formal sub-
2 specialty status for hospice and palliative medicine
3 (HPM) in 2006, and the Centers for Medicare &
4 Medicaid Services recognized hospice and palliative
5 medicine as a medical subspecialty in October of
6 2008.

7 (7) As of April 2015, there were a total of 106
8 hospice and palliative medicine training programs
9 accredited by the Accreditation Council for Graduate
10 Medical Education. For the 2014–2015 academic
11 year, these programs were training 265 physicians in
12 hospice and palliative medicine. Some programs in-
13 clude an additional track in research, geriatrics, pe-
14 diatrics, or public health.

15 (8) There is a large gap between those prac-
16 ticing in the palliative medicine field and the number
17 of physicians needed. A mid-range estimate by the
18 American Academy of Hospice and Palliative Medi-
19 cine’s Workforce Task Force calls for 6,000 or more
20 full-time equivalents to serve current needs in hos-
21 pice and palliative care programs. At maximum ca-
22 pacity, the current system would produce roughly
23 5,300 new hospice and palliative medicine certified
24 physicians over the next 20 years, during which time
25 some 70,000,000 new Medicare beneficiaries will

1 enter the Medicare program. At the same time, there
2 is expected to be increasing acceptance of the hos-
3 pice and palliative approach to care among the gen-
4 eral population and health care providers.

5 (9) According to the Institute of Medicine,
6 there is a “need for better understanding of the role
7 of palliative care among both the public and profes-
8 sionals across the continuum of care so that hospice
9 and palliative care can achieve their full potential for
10 patients and their families”.

11 **SEC. 3. PALLIATIVE CARE AND HOSPICE EDUCATION AND**
12 **TRAINING.**
