

114TH CONGRESS
1ST SESSION

S. 1178

To prohibit implementation of a proposed rule relating to the definition of the term “waters of the United States” under the Clean Water Act, or any substantially similar rule, until a Supplemental Scientific Review Panel and Ephemeral and Intermittent Streams Advisory Committee produce certain reports, and for other purposes.

IN THE SENATE OF THE UNITED STATES

APRIL 30, 2015

Mr. FLAKE (for himself, Mr. McCAIN, and Mrs. FISCHER) introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

A BILL

To prohibit implementation of a proposed rule relating to the definition of the term “waters of the United States” under the Clean Water Act, or any substantially similar rule, until a Supplemental Scientific Review Panel and Ephemeral and Intermittent Streams Advisory Committee produce certain reports, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*

2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Defending Rivers from

5 Overreaching Policies Act of 2015”.

1 **SEC. 2. WATERS OF THE UNITED STATES.**

2 (a) FINDINGS.—Congress finds that—

3 (1) according to the testimony of Assistant Sec-
4 retary of the Army for Civil Works Jo-Ellen Darcy
5 at the House of Representatives and Senate Joint
6 Hearing on State and Local Impacts of the Adminis-
7 tration’s Proposed Expansion of Waters Regulation
8 on February 4, 2015, that proposed expansion of
9 waters regulation “is based on science including a
10 peer-reviewed report on connectivity and the rec-
11 ommendations of EPA’s Science Advisory Board”;

12 (2) the proposed rule entitled “Definition of
13 ‘Waters of the United States’ Under the Clean
14 Water Act” (79 Fed. Reg. 22188 (April 21, 2014)),
15 was drafted before the science on which the pro-
16 posed rule was based had been reviewed by the Sci-
17 entific Advisory Board of the Environmental Protec-
18 tion Agency;

19 (3) the final review and synthesis of the sci-
20 entific evidence was released in January 2015, 2
21 months after the close of the public comment period
22 for the proposed rule;

23 (4) the review and synthesis of the scientific
24 evidence found that “the degree and downstream ef-
25 fects of those connections [between parts of a water-
26 shed] vary spatially and temporally” and the

1 “connectivity of streams and wetlands to down-
2 stream waters occurs along a continuum”;

3 (5) the authors of the review and synthesis were
4 unable to place the water bodies in the case studies
5 “along a gradient of connectivity” and reported that
6 “the research community has not reached a con-
7 sensus regarding the best methods or metrics to
8 quantify or predict hydrologic or chemical
9 connectivity”;

10 (6) without a scientific basis for evaluating the
11 degree of connectivity between a particular stream
12 and a traditionally navigable water, it is premature
13 to use the scientific literature to define which con-
14 nections are “significant”;

15 (7) because the analysis of the relevant science
16 was completed after the proposed rule described in
17 paragraph (2) was drafted, and because the sci-
18 entific review failed to produce a method to assess
19 the location of a particular water body on a “gra-
20 dient of connectivity”, the resulting proposed rule is
21 not effectively based on science; and

22 (8) because the likely cost of implementation of
23 that proposed rule will be greater than the
24 \$162,000,000 to \$278,000,000 cited in the testi-
25 mony of Administrator of the Environmental Protec-

1 tion Agency Gina McCarthy at the House of Rep-
2 resentatives and Senate joint hearing described in
3 paragraph (1), the proposal will have significant im-
4 pacts on many sectors of the United States economy.
