## A BILL

To establish a Federal Advisory Council to Support Victims  
of Gun Violence.

- 1       *Be it enacted by the Senate and House of Representa-*
- 2       *tives of the United States of America in Congress assembled,*

1   **SECTION 1. SHORT TITLE.**

2       This Act may be cited as the “Resources for Victims  
3   of Gun Violence Act of 2021”.

4   **SEC. 2. FINDINGS.**

5       Congress finds the following:

6           (1) In the United States, more than 100 individuals  
7   are killed with guns every day, totaling nearly  
8   40,000 individuals who die from gun violence  
9   every year.

10          (2) Additionally, more than 230 individuals sustain a nonfatal gun injury every day. According to  
11   a recent national poll, an estimated 10,000,000 individuals in the United States have been shot and injured in their lifetimes.

15          (3) In that same poll, approximately 58 percent  
16   of adults in the United States reported that they, or  
17   someone they care for, have experienced a form of  
18   gun violence, including a gun suicide, a gun homicide,  
19   domestic violence involving a gun, or an unintentional shooting.

21          (4) Nearly two-thirds of gun-related deaths in  
22   the United States are suicides. Most individuals who  
23   attempt suicide do not die—unless they use a gun.  
24   Approximately 90 percent of gun suicide attempts  
25   end in death, whereas 4 percent of suicide attempts  
26   not involving a firearm result in death.

1                         (5) This is particularly concerning for veterans,  
2 children, and teenagers. Veterans are 1.5 times more  
3 likely than non-veterans to die by suicide, and in  
4 2017, 69 percent of veteran suicides were by gun.  
5 Among children and teenagers, the rate of gun sui-  
6 cide has increased 59 percent over the past 10 years.

7                         (6) An estimated 40,000,000 adults in the  
8 United States report someone they cared for had at-  
9 tempted or died by suicide with a gun.

10                        (7) More than one-third of gun-related deaths  
11 in the United States are homicides, and in 2015, the  
12 gun homicide rate in the United States was nearly  
13 25 times higher than in other high-income countries.

14                        (8) Gun homicides in the United States occur  
15 disproportionately in cities, particularly in racially  
16 segregated neighborhoods with high rates of poverty.  
17 Gun homicide disproportionately affects communities  
18 of color, and Black Americans represent the major-  
19 ity of gun homicide victims.

20                        (9) More than 600 mass shootings, defined as  
21 shootings in which 4 or more individuals were shot  
22 and killed or injured, took place in the United States  
23 in 2020, and more than 2,600 mass shootings have  
24 taken place since the shooting at Sandy Hook Ele-  
25 mentary School in Newtown, Connecticut, in 2012.

1                         (10) Firearms are the leading cause of death  
2 for children and teenagers. In 2019, more than  
3 3,300 children and teenagers were shot and killed.  
4 Each year, approximately 15,600 children and teen-  
5 agers are shot and injured. Black children and teen-  
6 agers are 14 times more likely than their white peers  
7 to die by gun homicide.

8                         (11) During an average year in the United  
9 States, more than 600 women are shot to death by  
10 an intimate partner, and many more women are shot  
11 and injured by an intimate partner. Nearly  
12 1,000,000 women in the United States who are alive  
13 today have been shot or shot at by an intimate part-  
14 ner, and approximately 4,500,000 women in the  
15 United States today have been threatened with a  
16 gun by an intimate partner.

17                         (12) More than 10,300 violent hate crimes com-  
18 mitted in the United States in an average year in-  
19 volve a gun, or more than 28 each day. The vast  
20 majority of hate crimes are directed against commu-  
21 nities of color, religious minorities, and individuals  
22 in the LGBTQ+ community.

23                         (13) In 2020, communities and cities across the  
24 United States experienced an increase in gun vio-  
25 lence and gun homicides as the country struggled

1       with the economic and social uncertainty caused by  
2       the COVID–19 pandemic.

3                     (14) From March 2020 through November  
4       2020, an estimated 17,400,000 guns were sold, an  
5       81 percent increase over the same period in 2019.  
6       This unprecedented surge in gun sales put children,  
7       victims of domestic abuse, and communities of color  
8       at an even greater risk of gun violence.

9                     (15) The individuals who survive gun violence  
10      every year in the United States face a lifelong proc-  
11      ess of physical and emotional healing, in addition to  
12      the heavy economic costs faced by those survivors,  
13      their families and communities, and society as a  
14      whole. Furthermore, victims of gun violence are  
15      often unaware of or have trouble accessing many  
16      available resources that could help them in their re-  
17      covery.

18                     (16) Victims of gun violence experience per-  
19      sistent mental health problems, including post-trau-  
20      matic stress, depression, self-harm, anxiety, and sub-  
21      stance abuse. The National Center for PTSD (Post-  
22      Traumatic Stress Disorder) of the Department of  
23      Veterans Affairs estimates that 28 percent of indi-  
24      viduals who witness a mass shooting develop PTSD,  
25      and about one-third of those individuals develop

1 acute stress disorder. Victims of gun violence suffer  
2 from increased rates of unemployment, and young  
3 victims of gun violence are more likely to have lower  
4 grades and more absences from school.

5 (17) Young people who survive gun-related inci-  
6 dents are also at risk of experiencing gun violence  
7 again in the future. One study estimated that nearly  
8 one-fourth of the individuals who survive a gun  
9 shooting at age 24 or younger will be shot again  
10 within the next 10 years.

11 (18) Given the immense physical and emotional  
12 toll of gun violence on victims, Congress must do  
13 more to ensure that victims of gun violence have ac-  
14 cess to the resources they need to recover from their  
15 trauma—especially for victims experiencing common,  
16 everyday gun violence in racially segregated neigh-  
17 borhoods with high rates of poverty and chronic dis-  
18 investment.

19 **SEC. 3. DEFINITIONS.**

20 In this Act:

21 (1) ADVISORY COUNCIL.—The term “Advisory
