A BILL

To provide for a coordinated national research program to examine the nature, causes, consequences, and prevention of violence and unintended injury and death relating to gun ownership, use, and trafficking, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Gun Violence
5 Research Act”.

1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) In the last 50 years, more individuals in the
4 United States have died from gunshots than in all
5 wars in which the United States was a combatant,
6 combined.

7 (2) The rate of gun violence deaths in the
8 United States is more than double that of other
9 high-income nations.

10 (3) Guns accounted for 74 percent of homicides
11 and 51 percent of suicides in 2016, totaling over
12 37,000 deaths in the United States.

13 (4) Gun violence disproportionately affects ra-
14 cial minorities, with African Americans comprising
15 nearly 60 percent of homicide victims and 22 per-
16 cent of unintentional injury deaths in 2016.

17 (5) Provisions in appropriations Acts dating
18 back to 1996 have had a chilling effect on Federal
19 funding for research on gun violence across the Fed-
20 eral Government and, as a result, research on gun
21 violence is significantly underfunded relative to other
22 leading causes of death.

23 (6) Research examining the nature, causes, con-
24 sequences, and prevention of gun-related violence,
25 suicide, and unintentional injury and death does not

1 constitute advocacy in support of, or opposition to,
2 gun control policies or regulations.

3 (7) More research and high-quality data relat-
4 ing to gun violence are needed to inform the develop-
5 ment of effective strategies to reduce the incidence
6 of gun-related injury and death.

7 **SEC. 3. DEFINITIONS.**
