13          (d) DISADVANTAGED BUSINESS ENTERPRISES.—

14           (1) FINDINGS.—Congress finds that—

15           (A) despite the real improvements caused  
16           by the disadvantaged business enterprise pro-  
17           gram, minority- and women-owned businesses  
18           across the country continue to confront serious  
19           and significant obstacles to success caused by  
20           race and gender discrimination in the federally  
21           assisted surface transportation market and re-  
22           lated markets across the United States;

23           (B) the continuing race and gender dis-  
24           crimination described in subparagraph (A) mer-

1 its the continuation of the disadvantaged busi-  
2 ness enterprise program;

3 (C) recently, the disparities cause by dis-  
4 crimination against African American, Hispanic  
5 American, Asian American, Native American,  
6 and women business owners have been further  
7 exacerbated by the coronavirus pandemic and  
8 its disproportionate effects on minority- and  
9 women-owned businesses across the nation;

10 (D) Congress has received and reviewed  
11 testimony and documentation of race and gen-  
12 der discrimination from numerous sources, in-  
13 cluding congressional hearings and other inves-  
14 tigative activities, scientific reports, reports  
15 issued by public and private agencies at every  
16 level of government, news reports, academic  
17 publications, reports of discrimination by orga-  
18 nizations and individuals, and discrimination  
19 lawsuits, which continue to demonstrate that  
20 race- and gender-neutral efforts alone are insuf-  
21 ficient to address the problem;

22 (E) the testimony and documentation de-  
23 scribed in subparagraph (D) demonstrate that  
24 discrimination across the United States poses  
25 an injurious and enduring barrier to full and

1 fair participation in surface transportation-re-  
2 lated businesses of women business owners and  
3 minority business owners and has negatively af-  
4 fected firm formation, development and success  
5 in many aspects of surface transportation-re-  
6 lated business in the public and private mar-  
7 kets; and

8 (F) the testimony and documentation de-  
9 scribed in subparagraph (D) provide a clear pic-  
10 ture of the inequality caused by discrimination  
11 that continues to plague our nation and a  
12 strong basis that there is a compelling need for  
13 the continuation of the disadvantaged business  
14 enterprise program to address race and gender  
15 discrimination in surface transportation-related  
16 business.

17 (2) DEFINITIONS.—In this subsection, the fol-  
18 lowing definitions apply:

19 (A) SMALL BUSINESS CONCERN.—The

24 ADVANTAGED INDIVIDUALS.—The term “so-

2           8(d) of the Small Business Act (15 U.S.C.  
3           637(d)) and relevant subcontracting regulations  
4           issued pursuant to that Act, except that women  
5           shall be presumed to be socially and economi-  
6           cally disadvantaged individuals for purposes of  
7           this subsection.

9           CERNS.—Except to the extent that the Secretary of

11          10 percent of the amounts made available for any  
12          program under titles I, II, V, and VII of this divi-  
13          sion and section 403 of title 23, United States Code,  
14          shall be expended through small business concerns  
15          owned and controlled by socially and economically  
16          disadvantaged individuals.

17          (4) ANNUAL LISTING OF DISADVANTAGED BUSI-  
18          NESS ENTERPRISES.—Each State shall annually—

19                 (A) survey and compile a list of the small  
20                 business concerns referred to in paragraph (3)  
21                 in the State, including the location of the small  
22                 business concerns in the State; and

23                 (B) notify the Secretary, in writing, of the  
24                 percentage of the small business concerns that  
25                 are controlled by—

- 1 (i) women;
- 2 (ii) socially and economically dis-
- 3 advantaged individuals (other than
- 4 women); and
- 5 (iii) individuals who are women and
- 6 are otherwise socially and economically dis-
- 7 advantaged individuals.

8 (5) UNIFORM CERTIFICATION.—

9 (A) IN GENERAL.—The Secretary of

10 Transportation shall establish minimum uni-

11 form criteria for use by State governments in

12 certifying whether a concern qualifies as a small

13 business concern for the purpose of this sub-

14 section.

15 (B) INCLUSIONS.—The minimum uniform

16 criteria established under subparagraph (A)

17 shall include, with respect to a potential small

- 22 (iv) analyses of stock ownership;
- 23 (v) listings of equipment;
- 24 (vi) analyses of bonding capacity;
- 25 (vii) listings of work completed;

- 1 (viii) examination of the resumes of  
2 principal owners;  
3 (ix) analyses of financial capacity; and  
4 (x) analyses of the type of work pre-  
5 ferred.

6 (6) REPORTING.—The Secretary of Transpor-  
7 tation shall establish minimum requirements for use  
8 by State governments in reporting to the Sec-  
9 retary—

10 (A) information concerning disadvantaged  
11 business enterprise awards, commitments, and  
12 achievements; and

13 (B) such other information as the Sec-  
14 retary determines to be appropriate for the  
15 proper monitoring of the disadvantaged busi-  
16 ness enterprise program.

17 (7) COMPLIANCE WITH COURT ORDERS.—Noth-  
18 ing in this subsection limits the eligibility of an indi-  
19 vidual or entity to receive funds made available  
20 under titles I, II, V, and VII of this division and sec-  
21 tion 403 of title 23, United States Code, if the enti-  
22 ty or person is prevented, in whole or in part, from  
23 complying with paragraph (3) because a Federal  
24 court issues a final order in which the court finds

1 that a requirement or the implementation of para-  
2 graph (3) is unconstitutional.

3 (8) SENSE OF CONGRESS ON PROMPT PAYMENT  
4 OF DBE SUBCONTRACTORS.—It is the sense of Con-  
5 gress that—

6 (A) the Secretary of Transportation should  
7 take additional steps to ensure that recipients  
8 comply with section 26.29 of title 49, Code of  
9 Federal Regulations (the disadvantaged busi-  
10 ness enterprises prompt payment rule), or any  
11 corresponding regulation, in awarding federally  
12 funded transportation contracts under laws and  
13 regulations administered by the Secretary; and

14 (B) such additional steps should include  
15 increasing the Department of Transportation's  
16 ability to track and keep records of complaints  
17 and to make that information publicly available.

18 (9) SENSE OF CONGRESS ON FULFILLING CER-  
19 TAIN CONTRACTS.—It is the sense of Congress that  
20 contractors participating in a federally funded trans-  
21 portation contract with a small business concern  
22 owned and controlled by socially and economically  
23 disadvantaged individuals should ensure that the  
24 percentage of a contract promised to such small  
25 business concern is fulfilled, unless prior approval is

1       obtained consistent with the regulations under part  
2       26 of title 49, Code of Federal Regulations.

4 STATE-OWNED ENTERPRISES.—

5           (1) IN GENERAL.—Funds provided under this  
6       section may not be used in awarding or exercising

9       is owned or controlled by, is a subsidiary of, or is  
10      otherwise related legally or financially to a corpora-  
11      tion based in a country that—

17      Trade Representative in the most recent report  
18      required by section 182 of the Trade Act of  
19      1974 (19 U.S.C. 2242) as a priority foreign  
20      country under subsection (a)(2) of that section;  
21      and

22           (C) is subject to monitoring by the Trade  
23      Representative under section 306 of the Trade  
24      Act of 1974 (19 U.S.C. 2416).

1           (2) EXCEPTION.—For purposes of paragraph  
2           (1), the term “otherwise related legally or finan-  
3           cially” does not include a minority relationship or in-  
4           vestment.

5           (3) INTERNATIONAL AGREEMENTS.—This sub-  
6           section shall be applied in a manner consistent with  
7           the obligations of the United States under inter-  
8           national agreements.

10          23, United States Code.

11         (e) SPECIAL LIMITATION.—

18 of conduit redundant with a dig once  
19 requirement of a local government or  
20 Indian tribe;

21 (VI) there exists a circumstance  
22 involving force majeure; or

17                  that is non-discriminatory, competitively neutral,  
18                  and equal in opportunity, as compared to other  
19                  broadband providers, with respect to the program

17 (1) the 2018 report issued the American Soci-  
18 ety of Civil Engineers, titled “Climate-Resilient In-  
19 frastructure: Adaptive Design and Risk Manage-  
20 ment”; and

21 (2) the report issued by the California Climate-  
22 Safe Infrastructure Working Group, titled “Paying  
23 it Forward: The Path Toward Climate-Safe Infra-  
24 structure in California”.

25 (c) CONTENTS OF STUDY.—The study shall include  
26 specific recommendations regarding the following:

1           (1) Integrating scientific knowledge of projected  
2 climate change impacts, and other relevant data and  
3 information, into Federal infrastructure planning,  
4 design, engineering, construction, operation and  
5 maintenance.

6           (2) Addressing critical information gaps and  
7 challenges.

9 ient infrastructure.

10          (4) A platform or process to facilitate commu-  
11 nication between climate scientists and other experts  
12 with infrastructure planners, engineers and other  
13 relevant experts.

14          (5) A stakeholder process to engage with rep-  
15 resentatives of State, local, tribal and community  
16 groups.

18 climate-resilient infrastructure.

19          (7) Labor and workforce needs to implement  
20 climate-resilient transportation infrastructure  
21 projects including new and emerging skills, training  
22 programs, competencies and recognized postsec-  
23 ondary credentials that may be required to ade-  
24 quately equip the workforce.

1           (8) Outlining how Federal infrastructure plan-  
2           ning, design, engineering, construction, operation,  
3           and maintenance impact the environment and public  
4           health of disproportionately exposed communities.  
5           For purposes of this paragraph, the term “dis-  
6           proportionately exposed communities” means a com-  
7           munity in which climate change, pollution, or envi-  
8           ronmental destruction have exacerbated systemic ra-  
9           cial, regional, social, environmental, and economic  
10          injustices by disproportionately affecting indigenous  
11          peoples, communities of color, migrant communities,  
12          deindustrialized communities, depopulated rural  
13          communities, the poor, low-income workers, women,  
14          the elderly, residents of public housing (as such term  
15          is defined in section 3(b) of the United States Hous-  
16          ing Act of 1937 (42 U.S.C. 1437a(b)) and of other  
17          housing assisted under other Federal affordable  
18          housing programs as so designated by the Secretary  
19          of Housing and Urban Development, people experi-  
20          encing homelessness, people with disabilities, people  
21          who are incarcerated, or youth.

22          (d) CONSIDERATIONS.—In carrying out the study,  
23          the Transportation Research Board shall determine the  
24          need for information related to climate resilient transpor-  
25          tation infrastructure by considering—

1           (1) the current informational and institutional  
2 barriers to integrating projected infrastructure risks  
3 posed by climate change into federal infrastructure  
4 planning, design, engineering, construction, oper-  
5 ation and maintenance;

6           (2) the critical information needed by engineers,  
7 planners and those charged with infrastructure up-  
8 grades and maintenance to better incorporate cli-  
9 mate change risks and impacts over the lifetime of  
10 projects;

11          (3) how to select an appropriate, adaptive engi-  
12 neering design for a range of future climate sce-  
13 narios as related to infrastructure planning and in-  
14 vestment;

15          (4) how to incentivize and incorporate systems  
16 thinking into engineering design to maximize the  
17 benefits of multiple natural functions and emissions  
18 reduction, as well as regional planning;

19          (5) how to take account of the risks of cas-  
20 cading infrastructure failures and develop more ho-  
21 listic approaches to evaluating and mitigating cli-  
22 mate risks;

23          (6) how to ensure that investments in infra-  
24 structure resilience benefit all communities, includ-  
25 ing communities of color, low-income communities,

1 residents of public housing (as such term is defined  
2 in section 3(b) of the United States Housing Act of  
3 1937 (42 U.S.C. 1437a(b)) and of other housing as-  
4 sisted under other Federal affordable housing pro-  
5 grams as so designated by the Secretary of Housing  
6 and Urban Development, and Indian Tribes that  
7 face a disproportionate risk from climate change and  
8 in many cases have experienced long-standing unmet  
9 needs and underinvestment in critical infrastructure;

10 (7) how to incorporate capital assessment and  
11 planning training and techniques, including a range  
12 of financing options to help local and State govern-  
13 ments plan for and provide matching funds;

14 (8) how federal agencies can track and monitor  
15 federally funded resilient infrastructure in a coordi-  
16 nated fashion to help build the understanding of the  
17 cost-benefit of resilient infrastructure and to build  
18 the capacity for implementing resilient infrastruc-  
19 ture; and

20 (9) the occupations, skillsets, training pro-  
21 grams, competencies and recognized postsecondary  
22 credentials that will be needed to implement such  
23 climate-resilient transportation infrastructure

25 ated by such projects ensure that priority hiring con-

1       siderations are given to individuals facing barriers to  
2       employment, including individuals registered with a  
3       one-stop center, as defined under section 3 of the  
4       Workforce Innovation and Opportunity Act (29

7       term is defined in section 3(b) of the United States  
8       Housing Act of 1937 (42 U.S.C. 1437a(b)) and of  
9       other housing assisted under other Federal afford-  
10      able housing programs as so designated by the Sec-  
11      retary of Housing and Urban Development, and In-

3 (1) best practices for making public transpor-  
4 tation more resilient to external shocks, such as  
5 pandemics and natural hazards; and

6 (2) new materials and technologies that may

1 **SEC. 2608. SENSE OF CONGRESS REGARDING ELECTRIC VE-**  
2 **HICLE TRANSITION STRATEGY.**

3 (a) FINDINGS.—Congress finds the following:

4 (1) The transition to a modern electric fleet  
5 managed by the nation’s transit agencies represents  
6 a key opportunity to modernize and green the public  
7 transit fleets.

8 (2) The impending fleet transition presents dif-  
9 ficult workforce challenges for the transit agencies  
10 and their frontline workers as they prepare for the  
11 differences in purchasing, maintaining, and man-  
12 aging new electric buses and the related mainte-  
13 nance systems.

14 (3) The maintenance of electric engines re-  
15 quires fewer mechanics than does the maintenance  
16 of diesel and natural gas engines, which make up  
17 more than 99 percent of bus fleets in the United  
18 States.

19 (4) Although approximately 400,000 people  
20 work in public transportation, and of that figure, 90  
21 percent work in the frontline occupations, because of  
22 retirements and a massive transition in the transit  
23 workforce, large changes are bound for workers,  
24 transit agencies, and the communities that the tran-  
25 sit workforce serves.

1           (5) Based on the Department of Transportation  
2           and the Department of Labor data from 2014, tran-  
3           sit systems needed to hire, train, and retain approxi-  
4           mately 126 percent of their workforce over a 10-year  
5           period.

6           (6) The Department of Transportation, the  
7           Federal Railroad Administration, and sister Federal  
8           agencies like the Department of Energy and the De-  
9           partment of Labor can offer resources, strategy, and  
10          a research and development plan to prepare and as-  
11          sist in the upcoming transition to electric and clean  
12          vehicle systems.

13          (b) SENSE OF CONGRESS.—It is the sense of Con-  
14          gress that the transit industry needs an integrated, coop-  
15          erative, and forward-looking workforce development strat-  
16          egy in order to help frontline workers and the transit  
17          agencies prepare for and mitigate the workforce disruption  
18          challenges posed by the transition to electric vehicles and  
19          electric buses.

24 review required under subsection (d), the analyses per-

19                   (A) is identified as a nonmarket economy  
20                   country (as defined in section 771(18) of the  
21                   Tariff Act of 1930 (19 U.S.C. 1677(18))) as of  
22                   the date of enactment of this Act;

23                   (B) was identified by the United States

7           (2) EXCEPTION.—For purposes of paragraph

16                   (1) IN GENERAL.—

17                           (A) FUNDING.—Beginning on the date on  
18                           which a rail trust fund is established, any  
19                           amounts made available under subsections (a),  
20                           (g), (h), (i), (j)(1), (k), and (l) shall be derived  
21                           from such fund.

22                           (B) RAIL TRUST FUND DEFINED.—In this  
23                           subsection, the term “rail trust fund” means a  
24                           trust fund established under the Internal Rev-  
25                           enue Code of 1986 for making certain expendi-

1           tures for the benefit of rail and for crediting  
2           certain taxes and penalties collected relating to  
3           rail.

4           (2) SENSE OF COMMITTEE ON NEED FOR RAIL  
5           TRUST FUND.—The following is the sense of the  
6           Committee on Transportation and Infrastructure of  
7           the House of Representatives:

8                   (A) There is a discrepancy in historical  
9                   Federal investment between highways, aviation,  
10                  and intercity passenger rail. Between 1949 and  
11                  2017, the Federal Government invested more  
12                  than \$2 trillion in our nation’s highways and  
13                  over \$777 billion in aviation. The Federal Gov-  
14                  ernment has invested \$96 billion in intercity  
15                  passenger rail, beginning in 1971 with the cre-  
16                  ation of the National Railroad Passenger Cor-  
17                  poration. Intercity passenger rail Federal in-  
18                  vestment is only 12 percent of Federal aviation  
19                  investment and less than 5 percent of Federal  
20                  highway investment.

21                  (B) Congress has recognized the value and  
22                  importance of a predictable, dedicated funding  
23                  source through a trust fund for all other modes  
24                  of transportation including for aviation, high-  
25                  ways, transit, and waterways. The Highway

1 Trust Fund was created in 1956. The Airport  
2 and Aviation Trust Fund was created in 1970.  
3 The Inland Waterways Trust Fund was created  
4 in 1978. Mass transit was added to the High-  
5 way Trust Fund in 1983. The Harbor Mainte-  
6 nance Trust Fund was created in 1986. With  
7 regard to Federal transportation investment,  
8 only intercity passenger and freight rail do not  
9 have a predictable, dedicated funding source  
10 through a trust fund.

11 (C) The Federal Railroad Administration  
12 has identified more than \$300 billion worth of  
13 investment needed to develop both high-speed  
14 and higher speed intercity passenger rail cor-  
15 ridors around the United States. In addition, a  
16 Federal Railroad Administration report from  
17 2014 found that shortline and regional rail-  
18 roads need \$7 billion of investment. The North-  
19 east Corridor has a \$40 billion state of good re-  
20 pair backlog.

21 (D) A rail trust fund would provide a pre-  
22 dictable, dedicated funding source to high-speed  
23 and intercity passenger rail projects and for the  
24 public benefits of shortline and regional railroad  
25 freight rail projects. A trust fund provides es-

1           “(ii) improve high-speed rail or inter-  
2           city rail passenger performance, including  
3           congestion mitigation, reliability improve-  
4           ments, achievement of on-time perform-  
5           ance standards established under section  
6           207 of the Rail Safety Improvement Act of  
7           2008 (49 U.S.C. 24101 note), reduced trip  
8           times, increased train frequencies, higher  
9           operating speeds, electrification, and other  
10          improvements, as determined by the Sec-  
11          retary; and

12           “(iii) expand or establish high-speed  
13          rail or intercity rail passenger transpor-  
14          tation and facilities; or

15           “(B) corridor planning activities for high-  
16          speed rail described in section 26101(b).

17           “(2) PURPOSES.—Grants under this section  
18          shall be for projects that improve mobility, oper-  
19          ational performance, or growth of high-speed rail or  
20          intercity rail passenger transportation.

20          has the meaning given the term ‘socially and eco-  
21          nomically disadvantaged individuals’ in section 8(d)  
22          of the Small Business Act (15 U.S.C. 637(d)).

23          “(c) PROJECT REQUIREMENTS.—

1           “(1) REQUIREMENTS.—To be eligible for a  
2 grant under this section, an eligible applicant shall  
3 demonstrate that such applicant has or will have—

4                   “(A) the legal, financial, and technical ca-  
5 pacity to carry out the project;

## 14 **TITLE IV—COMMUTER RAIL** 15 **POLICY**

16 **SEC. 9401. SENSE OF CONGRESS REGARDING COMMUTER**  
17 **RAIL LIABILITY INSURANCE.**

18 (a) FINDINGS.—Congress finds the following:

19 (1) Prior to the COVID–19 pandemic, 32 com-  
20 muter railroads across the United States safely car-  
21 ried passengers on more than 500,000,000 trips  
22 each year.

1           (2) Commuter rail is a \$9,900,000,000 industry  
2 that creates and supports more than 200,000 public-  
3 and private-sector jobs, and continues to grow.

4           (3) Most commuter rail agencies are required to  
5 maintain liability insurance up to statutory liability  
6 limits.

7           (4) Commuter rail agencies face significant ob-  
8 stacles to finding and obtaining liability insurance.

9           (5) Only a handful of insurers offer this cov-  
10 erage, and a significant percentage of the railroad li-  
11 ability insurance marketplace is provided by foreign  
12 companies.

13           (6) The number of insurers in the American  
14 and foreign markets willing to even offer potential  
15 capacity for this coverage has drastically decreased  
16 over the past several years, and, regardless of cost,  
17 it is becoming extremely difficult for commuter rail-  
18 roads to obtain the needed coverage.

19           (7) Despite the exceptional safety record of  
20 commuter railroads and recent full compliance with  
21 positive train control, a 2021 survey of the American  
22 Public Transportation Association's commuter rail  
23 agencies revealed that there has been a 60 percent  
24 increase in premium costs over the last 3 years.

1           (8) The increase in premiums is largely due to  
2 factors outside the control of the commuter rail in-  
3 dustry, including major forest fires, hurricanes, and  
4 insurers exiting the market.

5           (9) The cost of liability insurance severely im-  
6 pacts the operating budgets of many commuter rail  
7 agencies and potentially affects their ability to offer  
8 these critical public transportation services.

9           (b) SENSE OF CONGRESS.—It is the sense of Con-  
10 gress that Congress should address the capacity and cost  
11 issues associated with the commuter rail liability insurance  
12 market and consider establishing a commuter rail insur-  
13 ance program within the Department of Transportation.

14 **SEC. 9402. SURFACE TRANSPORTATION BOARD MEDIATION**  
15 **OF TRACKAGE USE REQUESTS.**

16           Section 28502 of title 49, United States Code, is  
17 amended to read as follows:

18 **“§ 28502. Surface Transportation Board mediation of**  
19 **trackage use requests**

20           “A rail carrier shall provide good faith consideration  
21 to a reasonable request from a provider of commuter rail  
22 passenger transportation for access to trackage and provi-  
23 sion of related services. If, after a reasonable period of  
24 negotiation, a public transportation authority cannot  
25 reach agreement with a rail carrier to use trackage of, and

1 have related services provided by, the rail carrier for pur-  
2 poses of commuter rail passenger transportation, the pub-  
3 lic transportation authority or the rail carrier may apply  
4 to the Board for nonbinding mediation. In any case in  
5 which dispatching for the relevant trackage is controlled  
6 by a rail carrier other than the trackage owner, both shall  
7 be subject to the requirements of this section and included  
8 in the Board's mediation process. The Board shall conduct  
9 the nonbinding mediation in accordance with the medi-  
10 ation process of section 1109.4 of title 49, Code of Federal  
11 Regulations, as in effect on the date of enactment of the  
12 TRAIN Act. During such mediation process, the Board  
13 shall determine whether the consideration a rail carrier  
14 provided to a request was in good faith and whether the  
15 request from a provider of commuter rail passenger trans-  
16 portation was reasonable. The determinations made in the  
17 preceding sentence shall have no effect on the nonbinding  
18 nature of the mediation.”.

19 **SEC. 9403. SURFACE TRANSPORTATION BOARD MEDIATION**  
20 **OF RIGHTS-OF-WAY USE REQUESTS.**

21 Section 28503 of title 49, United States Code, is  
22 amended to read as follows:

1 **“§ 28503. Surface Transportation Board mediation of**  
2 **rights-of-way use requests**

3 “A rail carrier shall provide good faith consideration  
4 to a reasonable request from a provider of commuter rail  
5 passenger transportation for access to rail right-of-way for  
6 the construction and operation of a segregated fixed guide-  
7 way facility. If, after a reasonable period of negotiation,  
8 a public transportation authority cannot reach agreement  
9 with a rail carrier to acquire an interest in a railroad  
10 right-of-way for the construction and operation of a seg-  
11 regated fixed guideway facility to provide commuter rail  
12 passenger transportation, the public transportation au-  
13 thority or the rail carrier may apply to the Board for non-  
14 binding mediation. In any case in which dispatching for  
15 the relevant trackage is controlled by a rail carrier other  
16 than the right-of-way owner, both shall be subject to the  
17 requirements of this section and included in the Board’s  
18 mediation process. The Board shall conduct the non-  
19 binding mediation in accordance with the mediation proc-  
20 ess of section 1109.4 of title 49, Code of Federal Regula-  
21 tions, as in effect on the date of enactment of the TRAIN  
22 Act. During such mediation process, the Board shall de-  
23 termine whether the consideration a rail carrier provided  
24 to a request was in good faith and whether the request  
25 from a provider of commuter rail passenger transportation  
26 was reasonable. The determinations made in the preceding

1 sentence shall have no effect on the nonbinding nature of  
2 the mediation.”.

3                   **TITLE V—RAIL SAFETY**  
4           **Subtitle A—Passenger and Freight**  
5                   **Safety**

8 conduct a study on the safety impacts of the operation  
9 of long trains.

15                   (2) among other safety factors with respect to  
16 the operation of such trains, an evaluation of any—

17                           (A) potential risk of loss of communica-  
18 tions between an end-of-train device, or a dis-  
19 tributed power unit, and the locomotive cab, in-  
20 cluding communications over differing terrains  
21 and conditions;

6 associated with the deployment of multiple dis-  
7 tributed power units in the consists of such  
8 trains; and

17       (d)(1) is submitted, the Secretary shall implement any  
18       proposed actions described in such report.

19       (f) DEFINITION.—In this section, the term “long  
20       train” means a freight train composed of more than 150  
21       rail cars.

22       (g) FUNDING.—From the amounts made available  
23       for fiscal year 2021 to carry out section 20117(a) of title

21 Secretary shall review the reports filed by a railroad car-  
22 rier subject to section 20901(a) and analyze the data con-  
23 tained in such reports for trends or patterns of potential  
24 safety risks.

19 corridor is consistent with the purpose of the plan.

20 (b) CRITERIA FOR DESIGNATION.—The regulations  
21 promulgated by the Secretary under subsection (a)(1)

10 one or more native species;

11 (2) requires restoration, including—

12 (A) land or water that is degraded; and

17 (ii) to which the species may be re-  
18 introduced or restored based on habitat  
19 changes; and

20 (3) is fragmented or consists of only a portion  
21 of the habitat required for the connectivity needs of  
22 one or more native species.

23 (d) NOMINATION FOR DESIGNATION.—

2 time of the submission of the nomination  
3 for designation documenting why the cor-  
4 ridor is needed; and

5 (ii) the most current scientific reports  
6 available at the time of the submission of  
7 the nomination for designation;

8 (C) information with respect to how the  
9 nomination was coordinated with potential part-  
10 ners;

11 (D) a description of supporting stake-  
12 holders, such as States, Indian Tribes, local  
13 governments, scientific organizations, non-  
14 governmental organizations, and affected vol-  
15 untary private landowners; and
