17 read as follows:

18 **FOR THE DEPARTMENT OF COMMERCE**

19 Local and Community Projects 2016 (92000369)

20 The appropriation in this section is subject to the following
21 conditions and limitations:

22 (1) Except as directed otherwise prior to the effective date of
23 this section, the department may not expend the appropriation in this
24 section unless and until the nonstate share of project costs have
25 been either expended, or firmly committed, or both, in an amount
26 sufficient to complete the project or a distinct phase of the project
27 that is useable to the public for the purpose intended by the
28 legislature. This requirement does not apply to projects where a
29 share of the appropriation is released for design costs only.

30 (2) Prior to receiving funds, project recipients must demonstrate
31 that the project site is under control for a minimum of ten years,
32 either through ownership or a long-term lease. This requirement does
33 not apply to appropriations for preconstruction activities or
34 appropriations whose sole purpose is to purchase real property that
35 does not include a construction or renovation component.

36 (3) Projects funded in this section may be required to comply
37 with Washington's high performance building standards as required by
38 chapter 39.35D RCW.

1 (4) Project funds are available on a reimbursement basis only,
2 and shall not be advanced under any circumstances.

3 (5) Projects funded in this section must be held by the recipient
4 for a minimum of ten years and used for the same purpose or purposes
5 intended by the legislature as required in RCW 43.63A.125(6).

6 (6) Projects funded in this section, including those that are
7 owned and operated by nonprofit organizations, are generally required
8 to pay state prevailing wages.

9 (7) \$2,209,000 of the appropriation in this section is provided
10 solely for the Fairchild air force base protection and community
11 empowerment project, including the purchase of twenty acres of land
12 for development of affordable housing and the county's purchase of
13 mobile home parks in order to reduce the use of the accident
14 potential zone for residential purposes. There shall be no
15 limitations on the sequence on the purchase of mobile home parks. If
16 the county subsequently rezones, develops, and leases the mobile home
17 park property for commercial or industrial uses contrary to the
18 allowed uses in the accident potential zone, the county must repay to
19 the state the amount spent on the purchase of mobile home parks in
20 its entirety within ten years.

21 (8) \$850,000 of the appropriation in this section is provided
22 solely for the White River restoration project. Design solutions for
23 flooding reductions in the lower White River must include a
24 floodplain habitat design that both reduces flood risks and restores
25 salmon habitat by reconnecting the river with its floodplain and a
26 sustainable riparian corridor. Project designs and plans must also
27 identify lands for acquisition needed for floodplain reconnection
28 where pending or existing development eliminates the potential for
29 riparian and aquatic habitat restoration. The city shall work
30 cooperatively with the Muckleshoot Indian Tribe and the Puyallup
31 Tribe of Indians, and develop a plan collaboratively to achieve both
32 flood reduction and habitat restoration.

33 (9) Up to \$150,000 of the appropriation in this section for the
34 veterans helping veterans: Emergency transition shelter project may
35 be spent on preconstruction or pre-acquisition activities, including,
36 but not limited to, building inspections, design of necessary
37 renovations, cost estimation, and other activities necessary to
38 identify and select a facility appropriate for the program. The
39 remainder of the appropriation must be used for eventual acquisition
40 and renovations of a facility.

1 (10) \$2,500,000 of the appropriation in this section is provided
2 solely for the mercy housing and health care center at Sand Point.
3 During the 2015-2017 fiscal biennium, the center may not house any
4 community health care training organization that has been
5 investigated by and has paid settlement fees to the attorney
6 general's office for alleged medicaid fraud.

7 (11) The Lake Chelan land use plan must be developed without
8 adverse impacts on agricultural operations.

18 must reconsider tenants for the building, including consideration of
19 the utilities and transportation commission, all current tenants of
20 the general administration building with operations compatible with a

15 The appropriation in this section is subject to the following
16 conditions and limitations:

17 (1) \$950,000 of the appropriation is provided solely to help
18 offset the higher project costs for one or more construction projects
19 by state or local government agencies in which cross laminated timber
20 (CLT) is used for major structural elements of the building. Eligible
21 projects may include multifamily housing through the housing trust
22 fund, student housing for public higher education campuses,
23 prefabricated public school construction, and other state or local
24 government agency projects that may demonstrate the structural
25 utility of CLT. The legislature recognizes that early adoption of CLT
26 may result in higher project costs, but accelerating the acceptance
27 of CLT will produce economic and employment gains for the state and
28 will increase the value of timber on Washington state trust lands.
29 State agencies that receive allocations from this appropriation must
30 submit a project completion report that specifies how CLT was used
31 and the costs differences in materials and labor.

32 (2) \$75,000 of the appropriation is provided solely for a grant
33 to the Washington State University college of engineering and
34 architecture, to prepare a review and summary of available
35 engineering test results and other evidence demonstrating the

37 emphasize results and evidence that are relevant to the consideration

1 of building code amendments that allow for greater use of CLT in
2 construction. Administrative overhead charges by Washington State
3 University may not exceed five percent of the amount provided in this
4 subsection. The report must be submitted to the state building code
5 council and the appropriate committees of the legislature by December
6 1, 2016.

7 (3) \$50,000 of the appropriation is provided solely for a grant
8 to the department of commerce or an associate development
9 organization in an area of the state with appropriate forest

11 potential CLT market and determine necessary investments to
12 manufacture CLT.

23 conditions and limitations: The office of financial management shall
24 submit a higher education and skill center capital project equipment
25 cost study to the governor and the appropriate legislative fiscal
26 committees by December 1, 2015. The study must include benchmarks for
27 standard ranges of fixed and nonfixed equipment expenditures in
28 different types of facilities and an examination of alternatives for
29 financing equipment costs where the equipment has a life expectancy
30 that is less than the length of bond financing. The alternative

25 The appropriation in this section is subject to the following
26 conditions and limitations:

27 (1) The legislature finds that population growth, climate change,
28 and intensified development are creating increasing stresses on
29 critical water infrastructure, fisheries, and watershed health. To
30 inform policy decisions about the scale and timing of new investments
31 in flood risk reduction, water quality, and water supply both in-
32 stream and out-of-stream, it is the intent of the legislature to
33 direct an analysis of the economic implications related to water
34 infrastructure and fisheries habitat restoration needs across the
35 state.

1 (2) The appropriation in this section is provided solely for the
2 office of financial management to contract for an analysis of the
3 economic implications relating to water infrastructure and fisheries
4 habitat restoration needs.

5 (a) The analysis must incorporate existing data and information
6 relating to:

7 (i) Integrated water supply and management planning that

9 stream or out-of-stream water supply needs, or both, as well as
10 fisheries habitat and passage improvements;

16 and recreation benefits of improved floodplain and riparian habitat,
17 in-stream flows, municipal and agricultural water storage benefits,
18 and fish passage projects.

19 (c) The analysis must provide a review of other state reports
20 that examine the economic implications to water infrastructure and
21 fisheries habitat restoration needs.

22 (d) The analysis must address, but not be limited to:

23 (i) A 20 year forecast of known need for investment for the three
24 categories identified in (a) of this subsection;

26 infrastructure investment, including impacts on households, business,
27 and commerce caused by flooding, drought, and degraded water quality
28 from storm water runoff; and

29 (iii) Estimated economic benefits, including jobs, commerce, and
30 development associated with each billion dollars invested in the
31 categories in (a) of this subsection.

32 (3) The consultant shall invite representatives of interest
33 groups to provide input in conducting the analysis. The interest
34 groups must include, but are not be limited to, the Washington

25 Inventory and Condition of Schools Data Collection (91000033)

26 The appropriation in this section is subject to the following
27 conditions and limitations:

28 (1) The legislature intends to complete the data collection,
29 input, and verification of the inventory and condition of public
30 school facilities in order to make informed decisions about K-12
31 school facility data collection processes and classroom capacity
32 needs to fulfill current educational graduation requirements and
33 class-size ratios. These decisions are best made when based on
34 accurate data collected in a thorough and consistent manner by
35 professionals experienced in making such inventory and condition
36 assessments for public institutions.

37 (2) The appropriation is provided solely for the Washington State
38 University extension energy office to complete collection, input, and

1 verification of selected data of public school facilities, including
2 skill centers, in the inventory and condition of schools system
3 administered and maintained by the superintendent of public
4 instruction.

5 (3) The Washington State University extension energy office shall
6 conduct on-site visits to assess inventory and condition of all
7 facilities for school districts that have no current study and survey
8 as defined in RCW 28A.525.050 on file with the superintendent of
9 public instruction as of July 1, 2015, or no pending study and survey
10 to be filed with the superintendent through an outstanding study and
11 survey grant award. The data collected, sufficient to meet the study
12 and survey requirements for school facilities space inventory and
13 condition analysis, through on-site visits must be input into the
14 inventory and condition of schools system.

15 (4) The Washington State University extension energy office shall
16 input into the inventory and condition of schools system applicable
17 data of inventory and condition of school facilities from all current
18 studies and surveys on file with the superintendent of public
19 instruction as of July 1, 2015. The data must be input into the
20 system in a manner that captures older information and data first. As
21 studies and surveys from outstanding grant awards are filed with the
22 superintendent, the Washington State University extension energy
23 office shall input data into the system once current study and survey
24 data has been input. Activities conducted pursuant to this subsection
25 must occur concurrently with activities in subsection (3) of this
26 section.

27 (5) The Washington State University extension energy office shall
28 conduct on-site verification of data for school districts whose
29 current studies and surveys on file with the superintendent will
30 expire by June 30, 2017. Data verification must be conducted to
31 evaluate the study and survey process as a tool to collect accurate
32 inventory and condition of schools data upon which policymakers can
33 make informed decisions regarding school facility and capacity needs.
34 Activities conducted pursuant to this subsection must occur
35 concurrently with activities in subsection (3) of this section and
36 once sufficient data has been input into the system per subsection
37 (4) of this section to conduct on-site visits to verification.

38 (6)(a) The Washington State University extension energy office,
39 concurrent with activities conducted in subsections (3), (4), and (5)
40 of this section, must collect data to determine the information in

1 (c)(i) through (vii) of this subsection. Additional on-site data
2 collection for this task or collection of data from "as-built"
3 documents or other valid sources must be accomplished to produce a
4 valid sample for determining:

5 (b) The accuracy of reported number of classrooms in the most
6 recent survey of classrooms and building data by the office of the
7 superintendent of public instruction; and

8 (c) The variation in the size of schools and the allocation of
9 space to the categories described in (c)(i) through (vii) of this
10 subsection. The sample must be sufficient to determine this
11 information for elementary, middle, high schools, and skills centers
12 in districts of different sizes, growth rates, age, and relative
13 property values.

14 (i) The square footage and number of classrooms. Classrooms are
15 rooms that are used as classrooms or that could be used as classrooms
16 under building code requirements and must include labs, shops,
17 computer rooms used for instruction, art, and music classrooms. For
18 this purpose, a music classroom is not a room designed to seat an
19 audience;

20 (ii) The square footage of libraries;

21 (iii) The square footage of cafeteria and kitchen space;

22 (iv) The square footage of gymnasiums, locker rooms, and other
23 indoor athletic facilities;

24 (v) The square footage of auditoriums and other performing arts
25 space not counted as classrooms;

26 (vi) The square footage of administrative offices, and space used
27 primarily by staff; and

28 (vii) The square footage of other space such as bathrooms,
29 general circulation, mechanical rooms, and the balance of the total
30 facility square footage not included in (c)(i) through (vi) of this
31 subsection;

32 (d) The data included in (c)(i) through (vii) of this subsection
33 must indicate whether the space is in a structure with a permanent
34 foundation or not.

35 (7) As a general condition of appropriations provided to the
36 superintendent of public instruction in this act, the superintendent
37 of public instruction and each state school district shall provide
38 requested facilities information and access to facilities in a timely
39 manner to enable the Washington State University extension energy

1 office to complete the tasks, oversight, and reporting requirements
2 assigned in this section.

3 (8) The Washington State University extension energy office shall
4 report progress of data collection, input, and verification to the
5 appropriate committees of the legislature no later than December 1,
6 2015. The Washington State University extension energy office must
7 complete all work in this section and make a final report to the
8 appropriate committees of the legislature no later than December 1,
9 2016.

10 (9) If funding provided in this section is insufficient to carry
11 out the tasks identified within this section, the Washington State
12 University extension energy office shall prioritize the tasks to
13 ensure the requirements in subsection (6) of this section are
14 completed first. The Washington State University extension energy
15 office may enter into an interagency agreement with the office of
